biosensors for emerging and re emerging infectious diseases provides a review of how cornerstone optical electronic nanomaterial and data processing technologies can address detection issues occurring in a pandemic event this book gives insights into the fundamental physical chemical and biological mechanisms needed for such a type of detection the content covers potential biomarkers which can be used for the infectious disease diagnostic helping readers find the appropriate approach for the diagnosis of infectious diseases it presents a novel approach to transferring the sensing platform from lab to application in clinics and to point of care detection the book then moves on to discuss the function and efficiency of the

biosensing platform in early diagnosis of infectious diseases compared to the standard methods the required time the technician skills and the steps which must be performed are other key factors of the biosensing platform which are well explained covers applications of biosensors in diagnostics and detection of infection and in the application of new materials in biosensor development presents nano biosensor based point of care technologies introduces readers to the fundamentals of biosensors for infectious diseases

this book informs readers about recent advances in graphene carbocatalysis encapsulating the current developments in the syntheses properties characterizations functionalization and catalytic applications of graphene its derivatives and composites it serves as a comprehensive primary reference book for chemistry and engineering students who are required to learn about graphene chemistry in detail it also serves as an introductory reference for industry professionals and researchers who are interested in graphene research as well as its emerging applications in catalysis and beyond volume 2 presents information about the industrial applications of graphene based materials it starts with graphene based photocatalysis and progresses into the electrochemical applications of related materials highlighted applications in this domain include the use of graphene for hydrogen production and in electrodes for electrochemical sensors it also covers developments in graphene based smart energy materials the final chapter of the volume summarizes the future of graphene based material technology

it is a mistake to think that wars only concern armies involved in active engagement nothing is farther from the truth the real forces of evil wage a financial war the dark princes of debt finance have gained leverage over every important social economic and political institution including the health care delivery system in aids opium diamonds and empire author nancy turner banks draws the connections between free market strategies the destruction of national sovereignty by the process of globalization and aids as one of the health consequences of a neo darwinian philosophy through meticulous research banks found a medicalpharmaceutical industrial complex that was taken over one hundred years ago by the titans of financial capitalism their aim was to create profit not to conquer disease this book of social history points to a cauldron of historical events that contributed to the hiv aids crisis aids opium diamonds and empire tells the dramatic story of a financial ideology that is damaging to everything that it means to be human it is the story of profits over people in the end it is the story of hope and how we can regain our sanity and our health in a world gone mad
