this book provides innovative solutions to fundamental problems in finance such as the valuation of bond and equity the pricing of debt equity and total asset the determination of optimal capital structure etc which are unsolved or poorly solved so far the solutions in this book all have the following features based on essential assumptions in line with reality the final solutions are analytical solutions with closed form models the forms and variables of the models are determined by strict and objective logic processes rather than chosen or presumed subjectively such as the new growth model for stock valuation the new capm accounting for total risk rather than only systematic risk the real solution to optimal capital structure based on the trade off between tax shield and bankruptcy cost in addition these basic solutions or models are adjusted easily to various application scenarios

as indicated by the title this book focuses on fundamental problems in finance a logical dilemma in valuation stock valuation methods models risk valuation and optimal capital structure it presents an innovative approach to logic and quantitative reasoning without advanced mathematics that delivers valuable results convincing solutions to these problems readers in finance will definitely be interested in these solutions as well as the methods in fact these fundamental problems are essential in the field of finance and they have remained unsolved or partly unsolved for decades the solutions offered in this book are all sound in theory and feasible in practice and will hopefully benefit both theoretical research and practical decision making

the theme of this book new strategies for financial services providers is an equally relevant and important topic in science and practice in the post information age economy the german financial services market and many big financial services providers are in a deep crisis increasing competition due to deregulation and improved transparency through new means of communication on the one hand and empowered customers demanding individualized solutions for their financial problems e.g. because of new working circumstances increase the pressure on the market participants to alter their strategies according to these new challenges many firms have reacted defensively either by merging in the hopes of realizing scale effects a high risk venture considering the last few years or by adopting me too strategies also known as lemming banking that do not provide for a sustainable competitive advantage based on a profound analysis of developing mega trends in the years ahead especially

in information and its intense market Dr. Kundisch develops a new anti-cyclical strategy that aims at using it as an enabler to strengthen customer relationships and focus on individualized solutions wherever it seems economically sound to do so. However, he does not stop after the development of the strategy but provides two important concepts that may help turn this vision and strategy into reality. Thus, he favorably and refreshingly differentiates against many contributions that stop at the fairly abstract strategic level.

The 2nd International Conference of Business Accounting and Economics (ICBAE 2020) continued the agenda to bring together researchers, academics, experts, and professionals in examining selected themes by applying multidisciplinary approaches. This conference is the second intentional conference held by the Faculty of Economics and Business, Universitas Muhammadiyah Purwokerto, and it is a bi-annual agenda of this faculty. In 2020, this event will be held on 5-6 August at the Faculty of Economics and Business, Universitas Muhammadiyah Purwokerto. The theme of the 2nd ICBAE UMP 2020 is "Economics, Strength, Entrepreneurship, and Hospitality for Infinite Creativity Towards Sustainable Development Goals (SDGs)." It is expected that this event may offer contributions for both academics and practitioners to conduct researches related with business accounting and economics-related studies. Each contributed paper was refereed before being accepted for publication; the double-blind peer-reviewed process was used in the paper selection.

A practical problem-solving reference for commodity and forex derivatives problems and solutions in mathematical finance provides an innovative reference for quantitative finance students and practitioners using a unique problem-solving approach. This invaluable guide bridges the gap between the theoretical and practical to impart a deeper understanding of the mathematical problems encountered in the finance industry. Volume IV: Commodity and Foreign Exchange Derivatives breaks down the complexity of the topic by walking you step by step through a variety of modelling problems, building skill upon skill. You'll work through a series of problems of increasing difficulty as you learn both the strategy and mechanics behind each solution. Coverage includes both theoretical and real-world problems using stochastic calculus, probability theory, and statistics, as well as an assumed understanding of exotic options and interest rate models covered in Volumes II and III. Financial institutions rely on

quantitative analysis to inform decision making on trading hedging investing risk management and pricing this book provides both instruction and reference from a highly practical perspective giving you a highly applicable real world skillset fully grasp the fundamentals of commodity and foreign exchange derivatives follow mathematical modelling processes step by step link theory to real world problems through guided problem solving test your knowledge and skills with increasingly complex problem sets commodity and foreign exchange derivatives are a complex nuanced area in the quantitative finance realm simply reading about these instruments fails to convey the level of understanding required to work with them in the real world quants draw upon an in depth knowledge of both finance and mathematics every day problems and solutions in mathematical finance provides practical reference and problem solving skills for anyone learning or working in quantitative finance
