vol 25 is the report of the commissioner of education for 1880 v 29 report for 1877

today information and technological developments grow at a rapid pace social and political life becomes more and more complicated and in this process active citizenship becomes more essential knowledge driven changes in society and economies require individuals to quickly acquire new skills otherwise it is increasingly difficult for employees to adapt to business life and to find a job education has to take account of these circumstances adapt to the rapid developments in the world and educate individuals to continue lifelong learning for this skills such as active and independent learning assertiveness creativity self improvement lifelong learning are important skill teaching differs from knowledge teaching skill is the transfer of knowledge to practice this process involves a learning process that requires the steps of researching planning controlling and correcting the knowledge should be organized integrated transferred into practice mental and physical resources should be activated and knowledge use should be demonstrated in practice in order to improve the skill this book contributes to the teaching of skills and includes basic concepts and skills language skills science and mathematics skills psycho social skills and visual arts skills it also explains how to teach skills how to prepare for activities and how to implement activities in educational settings these applications are intended to draw attention to skill teaching to raise educators to increase the success of education to improve the skills of students and to enable them to use the skills they have learned in school outside of school and in complex tasks

in the spatial reformation michael j sauter offers a sweeping history of the way europeans conceived of three dimensional space

including the relationship between earth and the heavens between 1350 and 1850 he argues that this spatial reformation provoked a reorganization of knowledge in the west that was arguably as important as the religious reformation notably it had its own sacred text which proved as central and was as ubiquitously embraced euclid's elements aside from the bible no other work was so frequently reproduced in the early modern era according to sauter its penetration and suffusion throughout european thought and experience call for a deliberate reconsideration not only of what constitutes the intellectual foundation of the early modern era but also of its temporal range the spatial reformation contends that space is a human construct that is it is a concept that arises from the human imagination and gets expressed physically in texts and material objects sauter begins his examination by demonstrating how euclidean geometry when it was applied fully to the cosmos estranged god from man enabling the breakthrough to heliocentrism and by extension the discovery of the new world subsequent chapters provide detailed analyses of the construction of celestial and terrestrial globes albrecht dürer's engraving melencolia the secularization of the natural history of the earth and man and hobbes's rejection of euclid's sense of space and its effect on his political theory sauter's exploration culminates in the formation of a new anthropology in the eighteenth century that situated humanity in reference to spaces and places that human eyes had not actually seen the spatial reformation illustrates how these disparate advancements can be viewed as resulting expressly from early modernity's embrace of euclidean geometry

an international journal of general philosophy

includes part 1 number 1 2 books and pamphlets including serials and contributions to periodicals january december
