are images an important means of recalling information from memory and solving problems or are images just display lights on the mind's computer in image and mind stephen kosslyn makes an impressive case for the view that images are critically involved in the life of the mind in a series of ingenious experiments he provides hard evidence that people can construct elaborate mental images search them for specific information and perform such other internal operations as mental rotation kosslyn demonstrates that these results are best explained by a two tiered model in which images are stored in abstract form in long term memory and then assembled for internal display in much the way that images on a tv

screen can be created from files in a computer memory kosslyn shows how this model can be used to solve many of the persistent questions which have traditionally plagued theories of imagery that attempted to install imagery as the exclusive medium of mental representation unlike any other work on imagery image and mind provides an integrated account of most of the modern empirical results from imagery research within the framework of a coherent theory the book also introduces a host of new experimental techniques and major hypotheses to guide future research the result is a landmark book and a major event in the study of the mind

mental imagery refers to the mental simulation or recreation of perceptual experience across different sensory modalities the exploration of mental imagery represents a new and important area within clinical psychology but arguably one still in its infancy while mental imagery has featured prominently in recent theoretical accounts of disorders as diverse as post traumatic stress disorder phobia body dysmorphic disorder mood disorders and psychosis there remains an insufficiently strong theoretical and methodological foundation to enable comparison of the role of imagery across such different disorders the current research topic presents a diverse range of cutting edge papers focusing on investigating the underlying mechanisms and or treatment interventions associated with mental imagery in clinical disorders with the goal of helping establish those common elements most clinically relevant when investigating mental imagery the research topic comprises fifteen articles drawn from the fields of psychiatry psychology and neuroscience this is a unique collection of articles that combine different perspectives from the field of clinical psychology with more diverse perspectives drawn from the wider literature on mental imagery the original research studies and theoretical articles presented are organised around four main chapters that cover imagery and eye movements imagery and craving imagery and autobiographical memory and imagery and clinical disorders we believe that the range of submissions presented in the research topic make a strong contribution to helping establish a theoretical and methodological foundation that can enable the effective study of imagery across different disorders and domains

vol 77 includes yearbook of the association 1931

this collection of monographs traces the development of psychology in the united states from the 1630s to the present describing and explaining the influence of european and indigenous doctrines and methods and chronicling the process from meager beginnings to world leadership in the field illustrated

volume 33 of research in the social scientific study of religion brings together an open section and two special sections that illuminate new vistas in the study of religious and non religious belief special section 1 examines the historical roots of religious practice emerging from greater khurs in a historical cross road for many world religions special section 2 initiates a paradigm shift in study of religious and non religious belief in relation to children insisting upon foregrounding children s narratives both special sections explore under researched areas underlining the significance of historical and contextual approaches at an intrinsic level the volume interrogates the power dynamics that determine why particular voices and approaches are prioritised in the study of religious and non religious belief and why others remain under or mis heard

this unique handbook maps the growing field of consumer psychology in its increasingly global context with contributions from over 70 scholars across four continents the book reflects the cross cultural and multidisciplinary character of the field chapters relate the key consumer concepts to the progressive globalization of markets in which consumers act and consumption takes place the book is divided into seven sections offering a truly comprehensive reference work that covers the historical foundations of the discipline and the rise of globalization the role of cognition and multisensory perception in consumers judgements the social self identity and well being including their relation to advertising social and cultural influences on consumption including politics and religion decision making attitudes and behaviorally based research sustainable consumption and the role of branding the particularities of online settings in framing and affecting behavior the routledge international handbook of consumer psychology will be essential reading for anyone interested in how the perceptions feelings and values of consumers interact with the decisions they make in relation to products and services in a global context it will also be key reading for students and researchers across psychology and marketing as well as professionals interested in a deeper understanding of the field
