ever since mankind has thought that we have to be civilized socialized live in harmony with each other leaving our earth safe for generations to come making air and water cleaner for generations to come and leaving these clean since then we have intensified the practice of understanding explaining and learning and starts teaching each other and as a result we have conceptualized schools for our children and strive to show them systematically to our own our families the responsibilities towards our society our earth and environment and how we have to prepare our children for all these responsibilities prepare them and for these purposes a program of education has been prepared in schools and different different countries and civilizations in their own ways have prepared these programs according to their own needs and presented it to their children in schools in order to teach these programs methodically to children educational plans arrangements and a class of teachers have been prepared it is only natural that the more we learn the more civilized and gentle we become but it has also been seen that

this so called knowledge gives us somewhere with the feeling that i have come to know everything and now i can teach others and in the importance of teaching this we go through the airs and this pride starts to appear in our words thoughts and behavior and it is a basic vision than to see others as poor and ignorant a disorder is created that causes our learning to stop and at the same time we prove to be obstructive instead of helping others learn when the teacher is presented in front of the children in the classroom it is readily accepted by the children just like the parents because the children believe that school is also the form of home and we should learn here to live confidently for the life ahead of us to be prepared for the big reason is also that learning is the living tendency of human beings and it happens naturally all organisms have the ability to learn naturally and accordingly they also have learning instruments the systems of education the concerns of education basically have to accept that every child is ready to learn the basic tendency of learning is inherent in all children all children are capable of learning so one can learn this thing one cannot learn should not be born out all the teachers will have to reflect on their behavior that we are all in the learning phase only the difference of experience has happened i am more experienced than you and all of you will go through learning experiences as life progresses because school is a social responsibility the experiences here will be a little more organized which has been thought by the system of education and some experienced teachers that such experiences will take our children on the right path according to our education concerns this book makes a small effort in this direction that let us all present ourselves to our children in the spirit of learning so that we can connect meet and integrate with our children so that we prove to be helpful in their learning and be not obstructive let us take a pledge to be helpful in the learning of our children and present ourselves to the children with the desire to remain in the learning moods forever

students want to learn and excel as learners however a student cannot learn optimally on his or her own especially if a student had not already learned how to learn student may be ineffective and or unproductive in learning independently student learns best how to learn from adults that can provide such learning however in the name of educating a child an adult may imposed tasks upon student here student learn to pay attention to imposed tasks just enough to get a disciplinarian who imposed tasks off their backs while secretly devoting attention to concerns that are truly of interest to the students furthermore an adult may sugar coat a task in order to shield student from the unpleasant the experience of tasks and in their minds facilitate student learning here student may engage task but student learns in the task that it is his or her whims that are important he or she learn to make demands or otherwise fail to do assigned tasks in both cases students do not learn to learn well we cannot say that a student is learning well when all that a student may be doing is pay just enough attention to imposed task to get a disciplinarian off his or her back while secretly devoting attention to concerns that are truly of interest to the students similarly we cannot say that a student is learning when all that students is doing is practicing and or becoming increased practiced in making demands and failing to do assigned tasks some teachers may be moderate when they commit these mistakes and they convince themselves that because they are not extreme they therefore do not harm students this may be right in so far as human limitations prevent us from having an absolute best learning practice method however in terms of having a best focus that would help students to learn well many teachers fail because they do not learn what to look for in helping students to learn well in thinking and learning we advance the theory that to help students to learn well teachers must learn to focus upon student interest dewey 1934 point out that without an understanding of student interest a teacher may not know the direction a student is heading without an understanding of student interest a teacher may not be able to help students to learn well and students grope in

thinking and learning we define interest in terms of tendencies that one expresses when in the midst of objects problems we point out that in interest one seeks to extricate self from problems one thinks we point out that this type of thinking differs from thinking where one is seeking to secure an object advantage and gratify self in the last chapters of thinking and learning we develop an instructional program that focus upon fundamentals of what and how a student does when a student is in the midst of objects or problems and seeking to extricating self from them just as we focus upon fundamentals of what and how a student does in a task situation when a student seeks to accomplish tasks and secure a represented advantage we point out that the learning that is of significance to student is one in which student learn to generate develop and consider their concerns accordingly in the last chapters of thinking and learning you will learn about the instructional methods of goal and task thinking and learning gttl here goal thinking and teaching refer to student tendencies when a student is determining a direction for self and task thinking and teaching refer to student tendencies when a student is executing a plan to secure a determined advantage

hywel roberts and debra kidd s uncharted territories adventures in learning is a book of prompts provocations and possibilities designed to nourish creativity and generate ideas that will get teachers and pupils excited about learning in this time of high stakes testing growing mental health issues among young people and increasing pressure on teachers to focus on rote repetition and practice papers we have to step back and ask what is the purpose of education if you think it is to get children through tests then this book is probably not for you if however you think it is to develop wisdom in children the capacity to think to apply knowledge to empathise to weigh up evidence to consider consequences and to make informed choices then this book is most definitely for you rooted in practice and grounded in research uncharted territories invites a reassessment of what curriculum coverage can look like and provides an abundance of hooks into exploratory learning that place learners of whatever age knee deep in dilemma so that they are thinking deeply analytically and imaginatively these are not knowledge organisers or

schemes of work rather they are inspirational forays into imagined contexts for learning which as fantastical as they may appear always have the real world as their destination signposted by story starters and inductive questions not to mention the beautiful illustrations which are sure to fire children's imaginations. Hywel and Debra's innovative routes to learning will help teachers stray from the beaten track of the curriculum and instil in learners a sense of purpose as they discover, manipulate and apply knowledge and skills across a range of collaborative cross-curricular problem-solving contexts. Each chapter focuses on a different place such as a remote castle or a mysterious cave where the learning will be applied and challenged and is packed with starting points and what-ifs to establish rich landscapes for exploration and a wide range of opportunities for discussion and writing to help map out the territory ahead. Hywel and Debra guide the teacher around the key learning landmarks linked to each context's overarching concepts and lines of inquiry and point out the many different curriculum areas to which the explorations naturally lend themselves to. The authors go further by offering transferable ideas which can be adjusted to work with whatever age group as well as a variety of context-based tasks to enable the teacher to explore how elements of, for example, literacy and/or numeracy could be incorporated in order to save curriculum time while 'uncharted territories' is a rallying call to arms for the imagination in each of its chapters. Hywel and Debra also delve into the 'why' in order to present the teacher with a comprehensive debrief of the learning processes and the theoretical and academic underpinning. Furthermore, the authors provide a helpful listing of drama techniques and relevant books and poems that can be incorporated into the learning journeys as well as useful advice on how to assess and evidence their outcomes designed for use with learners of all ages from early years to secondary.
