when looking for a book on fish toxicology you might find one that discusses the biochemical and molecular aspects or one that focuses aquatic toxicology in general you can find resources that cover human and animal toxicology or ecotoxicology in general but no up to date comprehensive monograph devoted to the effects of chemical pollution on

excerpt from an annotated list of puget sound fishes so many inquiries have been made in recent years in regard to our native fishes it was deemed advisable to publish a brief popular survey of our fish fauna for the benefit of those interested in the marine life of this region the most recent list of the species of fish found in puget sound was published by professor e c stark of stanford university in 1911 he enumerates 168 forms of fish life known to exist in our waters or recorded from contiguous canadian territory with the presumption that they occur in puget sound several species have come to light since his paper was published and there is little doubt the number of kinds of fish in this region will be increased to at least 200 in the near future many of the species now on record are extremely rare although this may simply mean we do not know where or how to search for them in some cases but a single specimen has ever been seen and a number are recorded from a knowledge of less than half a dozen examples some are strays from southern waters or have straggled down from alaska while others have been swept into puget sound by some unusual circumstance from the open ocean where they normally reside the richness of the puget sound fauna is doubtless due to the fact that we have here a meeting place for two great centers of marine evolution many species of animals originally developed in alaska have gradually extended their range till they reached the

sound while from the other great center off the shores of california a similar migration has occurred in times past thus puget sound is the southern limit of the distribution of many northern forms while it is likewise the northern limit of a number of southern species about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks.com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

a major landmark contribution to fisheries science and fish ecology rockfish populations are in a severe decline throughout the northeastern pacific and the need for a deep understanding of their biology ecology and management has never been more critical this book addresses all aspects of our current knowledge of this diverse and interesting group of groundfish species and it is written clearly and with humor an outstanding work larry g allen california state university northridge quite simply the best account ever of the fascinating diverse and valuable rockfishes if you are interested in the marine fishes of the pacific coast you need this book peter b moyle author of inland fishes of california

the symposium pacific salmon and their ecosystems status and future options and this book resulted from initial efforts in 1992 by robert j naiman and deanna j stouder to examine the problem of declining pacific salmon *Oncorhynchus* spp our primary goal was to determine informational gaps as we explored different scientific sources state provincial and federal agencies as well as non profit and fishing organizations we found that the information existed but was not being communicated across institutional and organizational boundaries at this juncture we decided to create a steering committee and plan a symposium to bring together researchers managers and resource users the steering committee consisted of members from state and federal agencies non profit organizations and private industry see acknowledgments

for names and affiliations in february 1993 we met at the university of washington in seattle to begin planning the symposium the steering committee spent the next four months developing the conceptual framework for the symposium and the subsequent book our objectives were to accomplish the following 1 assess changes in anadromous pacific northwest salmonid populations 2 examine factors responsible for those changes and 3 identify options available to society to restore pacific salmon in the northwest the symposium on pacific salmon was held in seattle washington january 10 12 1994 four hundred and thirty five people listened to oral presentations and examined more than forty posters over two and a half days we made a deliberate attempt to draw in speakers and attendees from outside the pacific northwest
