a comprehensive examination of canadian federalism and its evolution from 1867 to the present

these papers document the personal and professional life of the foremost landscape architect in american history frederick law olmsted relocated from new york to the boston area in the early 1880s with the help of his stepson and partner john charles olmsted his professional office grew to become the first of its kind a modern landscape architecture practice with park subdivision campus residential and other landscape design projects throughout the country during the period covered in this volume olmsted and his partners apprentices and staff designed the exceptional park system of boston and brookline including the back bay fens franklin park and the muddy river improvement olmsted also designed parks for new york city rochester buffalo and detroit and created his most significant

campus plans for stanford university and the lawrenceville school the grounds of the u s capitol were completed with the addition of the grand marble terraces that he designed as the transition to his surrounding landscape many of olmsted s most important private commissions belong to these years he began his work at biltmore the vast estate of george washington vanderbilt and designed rough point at newport rhode island and several other estates for members of the vanderbilt family olmsted wrote more frequently on the subject of landscape design during these years than in any comparable period he would never provide a definitive treatise or textbook on landscape architecture but the articles presented in this volume contain some of his most mature and powerful statements on the practice of landscape architecture

in unfulfilled union garth stevenson examines such topics as the origins and objectives of confederation and the bna act of 1867 the interpretation of canada s federal constitution by the courts the impact of economic regionalism and quebec nationalism financial relations between the federal and provincial levels of government the consequences of federalism for economic policy the sources of federal provincial conflicts and the means to resolve them and the lengthy but inconclusive efforts to reform the constitution through federal provincial agreement particularly since quebec s quiet revolution in the 1960s although institutional factors such as the defects of the original constitution and the sometimes questionable interpretations of the judicial committee of the privy council are given due attention stevenson emphasizes the political economy of canada including its relationship with the united states and the vitality of quebec nationalism as the major reasons canada has not achieved the same level of centralization and stability as other federations in the industrialized world this updated edition of unfulfilled union includes a new introduction that discusses the extensive changes that have taken place in canadian federalism since that time

point chautauqua was designed by renowned landscape architect frederick law olmsted in 1875 on a wooded hillside rising steeply from the shores of lake chautauqua the only religious community designed by olmsted over the years it evolved into a hotel resort and then a lakeside residential community point chautauqua was listed on the national register of historic places in 1996 and is now considered one of the masterpieces of america s greatest landscape architect despite being in continuous use for nearly 150 years point chautauqua continues to exhibit the design principles that are hallmarks of olmsted creations it also poses a striking contrast to the more famous chautauqua institution across the lake olmsted criticized the prosaic grid pattern of streets which he felt denied institution residents a sense of connection with its lakeside site and found the crowding of buildings at the institution to be unhealthy taking a very different approach olmsted laid out point chautauqua with curving streets that follow the landscape and allow residents to enjoy views of the lake

and lake breezes like his earlier designs for riverside near chicago parkside in buffalo and tacoma washington point chautauqua anticipated the layout of many twentieth century suburban residential communities this priceless artifact is also a living working community of people making it a rewarding laboratory for students of historic landscape architecture as well as for those who seek the preservation of such communities

in recent years recreation scholars and professionals began calling for a return to municipal recreation s historical roots as a public good blaming neoliberal ideology for the current pay per use model these calls for a more inclusive recreation system have suggested the sector s business like practices should be of concern because they are in direct opposition to the historic mandate of equal opportunity a central assumption underlying these calls for the recreation profession to return to its historical roots is that municipal recreation

services until the late 1980s and early 1990s were available to all members of society this narrative is however a romanticized account of recreation's history in this book Lisa Tink challenges the often repeated narrative of a more inclusive and equitable era in recreation's past tracing some of the conditions that have given rise to what she has termed the recreation industrial complex Tink's research demonstrates how recreation has by design served the interests of white heterosexual able bodied middle to upper class Canadians by exposing the ways particular bodies came to be centered in a recreation context the purpose of this important piece of recreation scholarship is to demonstrate how historical inclusions and exclusions whether intentional or not were in fact part of a broader biopolitical project intended to sustain white supremacy with the ultimate goal of encouraging critical dialogues about what is inherently problematic difficult and dangerous in the discourses practices and policies that govern our contemporary recreation systems
