technical manual for applicants who are preparing for their private commercial or flight instructor pilot certificates with a helicopter rating also could be aid in training students contains detailed coverage of helicopter aerodynamics performance and flight performance includes items such as weather navigation radio navigation and communications 81 charts and tables

this book is not a substitution for the helicopter flight manual and should not be treated as such it is intended to give further information relating to the different sections of the flight manual and to explain the helicopter systems more clearly i have added in some extra information where i felt it would be beneficial but overall i have tried to keep the book as simple as possible while still covering all the sections in the flight manual this book will not teach you how to fly the aircraft however it will give you the necessary technical information to conduct your flight safely it is written with the new jet ranger pilot in mind it is assumed that you already hold your private pilot s licence and have limited or no previous jet ranger experience you should be familiar with flying techniques as this book will not teach you how to fly

this edition is intended to update the information on the atc system and procedures as well as cover the more recent improvements in aircraft instrumentation and avionics the performance stability and control and basic instrument flying chapters have been expanded with more partial panel recoveries and added information on spin

recoveries under the hood or in actual weather

the helicopter flying handbook is designed as a technical manual for applicants who are preparing for their private commercial or flight instructor pilot certificates with a helicopter class rating certificated flight instructors may find this handbook a valuable training aid since detailed coverage of aerodynamics flight controls systems performance flight maneuvers emergencies and aeronautical decision making is included

preface acknowledgments table of contents chapter 01 introduction to the helicopter chapter 02 aerodynamics of flight chapter 03 helicopter flight controls chapter 04 helicopter components sections and systems chapter 05 rotorcraft flight manual chapter 06 weight and balance chapter 07 helicopter performance chapter 08 ground procedures and flight preparations chapter 09 basic flight maneuvers chapter 10 advanced flight maneuvers chapter 11 helicopter emergencies and hazards chapter 12 attitude instrument flying chapter 13 night operations chapter 14 effective aeronautical decision making glossary index
