the results agenda adopted by the world bank and other donors aims to ensure that development assistance yields sustainable poverty reduction

effective poverty reduction results from three main factors sustained and inclusive growth effective service delivery to the poor and capable public sector institutions that are accountable to stakeholders for the results they achieve the annual review of development effectiveness 2006 assembles evaluative evidence around three questions central to poverty reduction how effectively has economic growth translated into poverty reduction in bank assisted countries and what factors have affected these results what factors have led to high quality results in areas that deliver services to the poor what measures help raise the accountability of public institutions responsible for delivering and sustaining these results the report identifies three key areas where the world bank can further strengthen its effectiveness in helping countries reduce poverty economic growth has improved in many bank client countries but a stronger focus on the nature of growth is needed to ensure that such growth leads to jobs for the poor and productivity increases in poorer regions and sectors where the poor earn their incomes consistent use of a clearly articulated results chain helps ensure that bank country assistance programs and individual projects set realistic objectives that key cross sectoral constraints to achieving them are adequately considered and that due attention is given to building capacity a realistic assessment of the political economy of governance related reforms is needed to tailor efforts to increase the accountability of public sector institutions to local conditions

arde 2003 examines the effectiveness of bank support for developing country policy reform it finds that bank support has contributed to reform in a number of cases but there are also cases where the bank s support has not been associated with improvements in the policy environment

the annual review of development effectiveness 2009 presents evidence on the world bank s efforts in two areas part i tracks the outcomes of bank projects and country programs and the evolution of monitoring and evaluation m and e part ii examines the bank s support for environmentally sustainable development compatible with economic growth and poverty reduction the bank s project performance rebounded in 2008 allaying concerns about the weakened performance in 2007 as previous ardes have shown project performance has been improving gradually for 15 years according to the traditional measure percent of projects with satisfactory versus unsatisfactory outcomes but ieg ratings of m and e quality for completed projects indicate considerable room for progress information to assess impacts continues to be lacking although preliminary data suggests improvements in baseline data collection bank support for the environment has recovered since 2002 due to new sources of concessional finance the outcomes of environment projects have improved in recent years a growing number of regional projects are addressing the shared use of water resources new global partnerships are deepening the bank s involvement in climate change issues but m and e remains weak three quarters of environment related projects those managed by sectors other than environment lack reporting of environmental outcomes

the report assesses the world bank group s support for growth and productivity in the agriculture sector enhancing agricultural growth and productivity is essential to meeting the worldwide demand for food and to reducing poverty particularly in the poorest developing countries between 1998 and 2008 the period covered by this evaluation the world bank group wbg provided 23.7 billion in financing for agriculture and agribusiness in 108 countries roughly 8 percent of total wbg financing spanning areas from irrigation and marketing to research and extension however this was a time of declining focus on agricultural growth and productivity by both countries and donors the cost of inadequate attention to agriculture especially in agriculture based economies came into focus with the food crisis of 2007-08 the crisis added momentum to an

emerging renewal of attention and stepped up financing to agriculture and agribusiness at the world bank and international finance corporation ifc as well as at several multilateral and bilateral agencies world bank financing rose two and a half times from 2008 to 2009 though that increase in lending seems to have been accompanied by a decline in analytical work which this review finds valuable for results this evaluation seeks to provide lessons from successes and failures to help improve the development impact of the renewed attention to the sector ratings against the world bank's stated objectives and ifc's market based benchmarks for agriculture and agribusiness projects have been equal to or above portfolio averages in east asia latin america and the transition economies in europe with notable successes over a long period in china and india but performance of wbg interventions has been well below average in sub saharan africa where ifc has had little engagement in agribusiness inconsistent client commitment and weak capacity have limited the effectiveness of wbg support in agriculture based economies particularly in sub saharan africa and constraints on staffing and internal coordination within the wbg have also hurt outcomes financial sustainability has been constrained by insufficient government funding and the difficulty of maintaining agricultural services and infrastructure the wbg has a unique opportunity to match the increases in the financing for agriculture with sharper focus on improving agricultural growth and productivity in agriculture based economies notably in sub saharan africa greater effort will be needed to connect sectoral interventions and achieve synergies from public and private sector interventions to build capacity and knowledge exchange to take stock of experience in rain fed agriculture to ensure attention to financial sustainability and to cross cutting issues of gender environmental and social impacts and climate and to better integrate wbg support at the global and regional levels with that at the country level

this evaluation of the bank s assistance on trade related issues focuses on the period between fiscal years 1987 and 2004 the majority of developing countries have significantly improved their environment for trade and economic growth following over two decades of assistance from the bank in trade reform arguably the developing world is more open today than at any time in recent memory developing countries have more than doubled their exports since the mid 1980s helping many of them to grow steadily exports and imports have risen as a share of the gross domestic product gdp across a wide range of countries fueled in part by china s remarkable trade performance and the growth in services trade trade policies have also been significantly liberalized average import tariffs have fallen steadily over the period although the fall in other forms of protection has been more gradual between fiscal years 1987 and 2004 about 8 1 percent of total bank commitments went to 117 countries to help them better integrate into the global economy this financing has been accompanied by a large volume of analysis in operational economic and sector work esw research publications on trade and working papers on trade related topics during the first phase starting in the 1980s the bank

focused largely on the traditional trade agenda related to opening up economies during the second phase from the mid to late 1990s the bank's emphasis on trade declined although the impact of earlier trade reforms was still playing out in the third phase initiated with the collapse of the world trade organization wto seattle trade ministerial meeting in 1999 growing pressure to deliver on the millennium development goals mdg and interest from development partners notably bilateral donors led the bank to reappraise its trade activities this phase has focused on the global trading system and behind the border barriers to trade the bank's trade activities during the period were led by a trade policy reform package supported by four components import related export related exchange rate and foreign exchange management and industrial and other supporting policies this assessment reviews project related outcomes and outputs to focus on the progress toward a more development friendly trading recommendations include addressing poverty distributional outcomes and external shocks in a balanced approach revisiting the balance between global and country agendas and strengthening operational links on trade issues and strengthening knowledge management efforts
