a sweeping history of social theories about war and peace from hobbes to the twenty first century this book the first of its kind provides a sweeping critical history of social theories about war and peace from hobbes to the present distinguished social theorists hans joas and wolfgang knöbl present both a broad intellectual history and an original argument as they trace the development of thinking about war over more than 350 years from the premodern era to the period of german idealism and the scottish and french enlightenments and then from the birth of sociology in the nineteenth century through the twentieth century while focusing on social thought the book draws on many disciplines including philosophy anthropology and political science joas and knöbl demonstrate the profound difficulties most social thinkers including liberals socialists and those intellectuals who could be regarded as the first sociologists had in coming to terms with the phenomenon of war the most obvious form of large scale social violence with only a few exceptions these thinkers who believed deeply in social progress were unable to account for war because they regarded it as marginal or archaic and on the verge of disappearing this overly optimistic picture of the modern world persisted in social theory even in the twentieth century as most sociologists and social theorists either ignored war and violence in their theoretical work or tried to explain it away the failure of the social sciences and especially sociology to understand war joas and knöbl argue must be seen as one of the greatest weaknesses of disciplines that claim to give a convincing diagnosis of our times
