as societies governments corporations and individuals become more dependent on the digital environment so they also become increasingly vulnerable to misuse of that environment a considerable industry has developed to provide the means with which to make cyber space more secure stable and predictable cyber security is concerned with the identification avoidance management and mitigation of risk in or from cyber space the risk of harm and damage that might occur as the result of everything from individual carelessness to organised criminality to industrial and national security espionage and at the extreme end of the scale to disabling attacks against a country s critical national infrastructure but this represents a rather narrow understanding of security and there is much more to cyber space than vulnerability risk and threat as well as security from financial loss physical damage etc cyber security must also be for the maximisation of benefit the oxford handbook of cyber security takes a comprehensive and rounded approach to the still evolving topic of cyber security the security of cyber space is as much technological as it is commercial and strategic as much international as regional national and personal and as much a matter of hazard and vulnerability as an opportunity for social economic and cultural growth

the impacts of population growth climate change and water scarcity and variability on a country s economy or society in addition to the sheer need to harness international rivers for domestic and regional purposes have made the management of transboundary freshwater a subject of great import over the past several decades research in various disciplines utilizing a variety of methodologies has explored these issues focusing on freshwater s strategic importance as well as conflict cooperation and negotiation over shared water bodies rivers lakes aquifers this multi volume set seeks to contribute to this still burgeoning body of literature by focusing on several key themes that can help explain and recognize successes and failures in transboundary freshwater management in particular the set seeks to bring together original scholarship focusing on international law technology institutions formal and informal and the interplay of domestic and international affairs each edited volume in the set aims to build on extant research while also fostering new paths of inquiry overall the set seeks to become a guide for both academics and practitioners hoping to better understand the joint management of this precious

natural resource from socio political legal economic and technological perspectives volume 1 explores international law for shared freshwater resources both surface and subsurface waters from a multidisciplinary perspective it explains the role of international water law iwl and or specific norms within particular contexts case studies and critically examines that role and its relative success or failure in achieving the intended objectives volume 2 explores the roles of and limitations of technologies and their applications in the management of transboundary water and wastewater it presents case studies and legal and political analyses that focus on the potential or actual roles and implications of the technologies in transboundary policy and management rather than detailed explications of the technologies themselves volume 3 contributes to the growing literature seeking to understand how when and if institutions broadly defined impact states abilities to address their joint water disputes the volume presents a combination of single comparative and empirical analyses of cases across the world about the role of institutions in facilitating collaboration over transboundary water resources and mitigating conflict volume 4 seeks to make sense of the interplay of domestic transnational and international dynamics in explaining conflict and cooperation over water through single or comparative case studies as well as analyses of on the ground transboundary water management experiences arising from these complex political dimensions
