short of astonishing this richly illustrated volume provides a wide ranging history of western medicine charting the great milestones of medical progress from the birth of rational medicine in the classical world right up to the present day the history begins in ancient greece where medical practice under the auspices of hippocrates and others first looked past supernatural explanations and began to understand disease as a product of natural causes it chronicles the slow growth of medical knowledge through the middle ages and the renaissance illuminating the work of figures such as paracelsus vesalius and william harvey who explained how blood circulates through the body and it provides portraits of more modern figures like louis pasteur and robert koch the fathers of bacteriology wilhelm roentgen the discoverer of x rays and paul ehrlich who pioneered the use of chemicals to destroy disease causing organisms authoritative informative and beautifully designed this volume offers a truly fascinating introduction to medicine in the west

how human institutions markets states communities religions guilds and families have helped both to control and to exacerbate epidemics throughout history how do societies tackle epidemic disease in controlling contagion sheilagh ogilvie answers this question by exploring seven centuries of pandemics from the black death to covid 19 for most of history infectious diseases have killed many more people than famine or war and in 2019 they still caused one death in four today we deal with epidemics more successfully than our ancestors managed plague smallpox cholera or influenza but we use many of the same approaches long before scientific medicine human societies coordinated and innovated in response to biological shocks sometimes well sometimes badly ogilvie uses historical epidemics to analyse how human societies deal with externalities situations where my action creates costs or benefits for others beyond those that i myself incur social institutions markets states communities religions guilds and families help us manage the negative externalities of contagion and the positive externalities of social distancing sanitation and immunization ogilvie shows how each institution enables us to coordinate innovate and inspire each other to limit contagion but each institution also has weaknesses that can make things worse markets shut down voluntarily during every epidemic in history but they also brought people together spreading contagion states mandated quarantines sanitation and immunization but they also waged war and censored information exacerbating epidemics religions admonished us to avoid infecting our neighbours but they also preached against science and medical innovations what decided the outcome ogilvie argues was a temperate state an adaptable market and a strong civil society where a diversity of institutions played to their own strengths and checked each other s flaws
