this work is aimed at mrcs candidates sitting the viva examination which takes place at the end of their training period it covers applied surgical anatomy and operative surgery applied physiology and critical care and clinical pathology and principles of surgery

this book is a succinct set of notes in a question and answer format covering the

fundamental principles of surgery it is aimed at anyone who works in a surgical specialty not only surgeons but also nurses operating department assistants assistants in surgical practice trainee surgeons junior doctors dentists podiatrists and medical students of all surgically oriented disciplines many facts and principles are important to those who work in a surgical field but there is no single unifying book that has covered all the basic essential material that everyone should know regardless of their discipline equally many of the existing surgical principle books are written purely for surgeons and of course eighty percent of their content is relevant only to surgeons and medical students and not the wider audience there is a lot of redundancy not to mention expense in reading these books this book is essential reading in order to have a firm grasp of the fundamental principles of surgery before specialising into one of today's surgical disciplines

excerpt from principles of surgical nursing a guide to modern surgical technic in presenting this volume to the nursing and hospital world i do so with some trepidation i am not so fatuous as to believe i am imparting information to such a degree as will enable the student or graduate nurse to gain possession of all that is requisite for a nurse engaged in surgical nursing the foremost thought has been to impart essential basic principles that will enable a nurse to acquire a reliable fundamental knowledge possessed of facts and conversant with their administrative principles the attainment of perfection will be readily acquired by conscientious work enlarged experience collateral reading and study with but one or two exceptions i have purposely omitted all discussion of the literature devoted to surgical nursing the subject matter may in places reflect previous expressions and opinions but upon the whole the text is based upon the authors personal conclusions and experiences and the views that have been acquired by perusal of the surgical literature which has appeared from time to time in current literature and proven satisfactory in our operative work throughout the presentation of this entire subject my endeavor has been to impart facts briefly and concisely so that the instruction would not be lost in a maze of descriptive and lengthy text unusual obsolete and unimportant methods have been purposely omitted in an effort to present the primary and pertinent points the sole purpose has been to describe recognized principles of technic accepted plans of procedure and treatment as they exist in present day practice of surgery and surgical nursing to advance all the viewpoints and methods of surgeons and instructors of nurses would be impracticable instead i have endeavored to present practical methods that would be applicable in the majority of instances about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at [forgottenbooks.com](http://forgottenbooks.com) this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
