European co-operation has resulted in many new and challenging opportunities for legal scholars who since the so-called codification period have become used to operating in a purely national context. This applies also to scholars in the field of civil procedure who for a considerable period of time have resisted leaving the purely national domain. These scholars have devoted a great deal of attention to the question whether or not harmonisation of civil procedural law is a feasible option and if so in what manner harmonisation should be achieved. The contributors to this book seek to further the harmonisation debate by exploring some of the main trends in the development of civil procedural law during the last two centuries in several European countries: Germany, Austria, Switzerland, France, England and Wales, the Netherlands and Belgium. Two of the central issues that are addressed by the contributors are the extent to which the various procedural models have influenced each other and the extent to which common traditions in civil procedural law may be distinguished in Europe. Each general chapter in this book is supplemented by three chapters devoted to specific procedural topics: conciliation, party interrogation as evidence and the role of the judge. In addition, extensive bibliographical references are included.

Civil justice in the United States is neither civil nor just; instead, it embodies a maxim that the American legal system is a paragon of legal process which assures its citizens a fair and equal treatment under the law. Long have critics recognized the system's failings while offering abundant criticism but few solutions. This book provides a comparative critical introduction to civil justice systems in the United States, Germany and Korea. It shows the shortcomings of the American system and compares them with German and Korean successes in implementing the rule of law. The author argues that these shortcomings could easily be fixed if the American legal systems were open to seeing how other legal systems' civil justice processes handle cases more efficiently and fairly. Far from being a treatise for specialists, this book is an introductory text for civil justice in the three aforementioned legal systems.

Treatise and commentary on monopoly structure and international market regulation in context with national economic legislation and international law. Examines trade policy issues with regard to trade regulation and includes contracting and licensing, trade mark protection, foreign investment restrictions, jurisdiction over foreign enterprise, arbitration, the role of USA, etc. references.

includes entries for maps and atlases

This book, the fourth in a series prepared by the International Litigation Committee of the IBA's Section on Business Law, contains contributions by distinguished lawyers on important aspects of litigation in countries throughout the world. Some 25 individual jurisdictions are addressed with a special chapter on European law. Authors from each country cover topics as follows to achieve as thorough a treatment as possible: the court system, motions made or material submitted before the trial starts, pre-trial orders, procedures which vary from court to court or judge to judge, the role of a judge, juries and how they are selected, the role of the lawyers, witnesses, explanation and cross-examination, transcripts, cameras or other recording devices, decision by judge, written decision, findings of fact, instruction to jury, setting aside the verdict, appeals, other special or unusual aspects of trials or hearings. Chapters are presented within major regions: Asia, South Pacific, Europe, South America, North America. The work was originally prepared for the 1990 biannual meeting of the IBA in New York and these revised contributions faithfully reflect the considerable expertise brought to bear on the subject.
