behind the scenes of the many artists and innovators flourishing beyond the bounds of intellectual property laws intellectual

property law or ip law is based on certain assumptions about creative behavior the case for regulation assumes that creators have a fundamental legal right to prevent copying and without this right they will under invest in new work but this premise fails to fully capture the reality of creative production it ignores the range of powerful non economic motivations that compel creativity and it overlooks the capacity of creative industries for self governance and innovative social and market responses to appropriation this book reveals the on the ground practices of a range of creators and innovators in doing so it challenges intellectual property orthodoxy by showing that incentives for creative production often exist in the absence of or in disregard for formal legal protections instead these communities rely on evolving social norms and market responses sensitive to their particular cultural competitive and technological circumstances to ensure creative incentives from tattoo artists to medical researchers nigerian filmmakers to roller derby players the communities illustrated in this book demonstrate that creativity can thrive without legal incentives and perhaps more strikingly that some creative communities prefer and thrive in environments defined by self regulation rather than legal rules beyond their value as descriptions of specific industries and communities the accounts collected here help to ground debates over ip policy in the empirical realities of the creative process their parallels and divergences also highlight the value of rules that are sensitive to the unique mix of conditions and motivations of particular industries and communities rather than the monoculture of uniform regulation of the current ip system

examines her own southern history grounding it all in a thorough understanding of the relevant literature the result is a deft and entertaining dive into the territory of southern cuisine black eyed peas and cornbread fried chicken and fried okra pound cake and peach cobbler and a look at and beyond southern food tropes that reveals much about tradition identity and the yearning for authenticity tippen discusses the act of cooking as a way to perform and therefore reinforce the identity associated with a recipe and the complexities inherent in attempts to portray the foodways of a region marked by a sometimes distasteful history inventing authenticity meets this challenge head on delving into problems of cultural appropriation and representations of race thorny questions about authorship and more the commonplace but deceptively complex southern cookbook can sustain our sense of where we come from and who we are or who we think we are
