this volume gives a vital and unique insight into the effects of mining and other forms of resource extraction upon the indigenous peoples of australia and papua new guinea based on extensive fieldwork it offers a comparative focus on indigenous cosmologies and their articulation or disjunction with the forces of development a central dimension of contrast is that australia as a settled continent has had wholesale dispossession of aboriginal land while in papua new guinea more than 95 of the land surface remains unalienated from customary ownership less obviously there are also important similarities owing to a shared form of land title in which the state retains ownership of underground resources the manner in which western law has been used in both countries to define and codify customary land tenure an emphasis on the reproductive imagery of minerals petroleum and extraction processes employed by aborigines and papua new guineans and some surprising parallels in the ways that social identities on either side of the arafura sea have traditionally been grounded in landscape these studies are essential reading for all scholars involved in assessing the effects of resource extraction in third world and fourth world settings they contribute penetrating studies of the forms of indigenous socio cultural response to multinational companies and western forms of governance and law advance praise the writing is new and interesting the essays mark out new ideas in seemingly effortless abundance in sum buy it

read it i think you ll agree that its one of the really interesting books of the year deborah rose senior fellow centre for resource and environmental studies anu alan rumsey is a senior fellow in the department of anthropology and james weiner a visiting fellow in the resource management in asia pacific program both in the research school of pacific and asian studies australian national university

seminar paper from the year 2011 in the subject american studies culture and applied geography grade 1 0 university of passau language english abstract the paper analyses and compares different theoretical models of the u s mexico border regions special attention is placed on the models of martinez pick and butler and alegría these findings are compared to current socio economic data to review their applicability finally the author amalgamates these ideas and develops a new model on this basis
