in the tradition of mark kurlansky's *cod* and david bodanis's *e mc2* the battery is the first popular history of the technology that harnessed electricity and powered the greatest scientific and technological advances of our time what began as a long running dispute in biology involving a dead frog's twitching leg a scalpel and a metal plate would become an invention that transformed the history of the world the battery from alessandro volta's first copper and zinc model in 1800 to twenty first century technological breakthroughs science journalist henry schlesinger traces the history of this essential power source and demonstrates its impact on our lives volta's first battery not only settled the frog's leg question it also unleashed a field of scientific research that led to the discovery of new elements and new inventions from samuel morse's telegraph to alexander graham bell's telephone to thomas edison's incandescent lightbulb and recent advances like nanotechnology are poised to create a new generation of paradigm shifting energy sources schlesinger introduces the charlatans and geniuses paupers and magnates attracted to the power of the battery including michael faraday guglielmo marconi gaylord wilshire and hugo gernsback the publisher and would be inventor who coined the term science fiction a kaleidoscopic tour of an ingenious invention that helped usher in the modern world the battery is as entertaining as it is enlightening

in this new history david edgerton invites us to rethink how technology is used for instance horses contributed more to nazi conquests than the v2 in influence ikea kamprad matches bill gates and corrugated iron is not dead yet

the technical problems confronting different societies and periods and the measures taken to solve them form the concern of this annual collection of essays volumes contain technical articles ranging widely in subject time and region as well as general papers on the history of technology in addition to dealing with the history of technical discovery and change history of technology also explores the relations of technology to other aspects of life social cultural and economic and shows how technological development has shaped and been shaped by the society in which it occurred

technology a world history offers a brilliant history of invention around the globe historian daniel r headrick ranges from the stone age and the beginnings of agriculture to the industrial revolution and the electronic revolution of the recent past in tracing the growing power of humans over nature through increasingly powerful innovations he compares the evolution of technology in different parts of the world providing a much broader account than is found in other histories of technology
