for many years i have been interested in computer chess and have collected almost every learned paper and article on the subject that i could find my files are now quite  
large and a considerable amount of time effort and expense has been required to build up this collection i have often thought how difficult it must be for many computer  
chess enthusiasts to acquire copies of articles that they see referenced in some other work unless one has access to a good reference library the task is almost impossible

i therefore decided to try to make available in one volume as many as possible of the most interesting and important articles and papers ever written on the subject such a selection is naturally somewhat subjective and i hope that i will not offend authors whose works have been excluded in particular i have decided to exclude any material which has appeared in the journal of the international computer chess association icca or in its precursor the icca newsletter the reason is simply that the icca itself is in the process of compiling a compendium containing the most important material published in those sources for further information on icca membership and publications the reader is invited to contact professor h 1 van den herik or dr jonathan schaeffer university of limburg computing science department department of computer science university of alberta 6200 md maastricht edmonton netherlands alberta canada t6g 2h1

the increase in strength of chess computers over the last ten years has resulted in many books and articles on programming methods and new approaches to analyzing positions in this book important articles have been collected in one volume together with the best games by chess computers including the first five world microcomputer championships every article has been transliterated into algebraic notation and the book is aimed at chess players and computer enthusiasts particularly those with an interest in artificial intelligence

chess is a staggering invention if indeed it was invented maybe it just evolved it is still evolving now faster than ever and peter doggers has traced and tracked its never ending development with wit vigour and insight nothing artificial about his intelligence sir tim rice an entertaining and instructive overview of a game in the throes of reinvention financial times how the game of kings became the king of games throughout history chess has inspired writers painters filmmakers musicians mathematicians and scientists yet despite being 1 500 years old chess has never been more popular than it is today how did it become the most prominent game in western culture in this fascinating book acclaimed chess com journalist peter doggers explores chess as a cultural phenomenon from its earliest beginnings in ancient india to its influence on pop culture the arts and science he examines its biggest stars and most dramatic moments the impact of ai cheating scandals esports and the online revolution culminating in the game s meteoric rise in the digital age leading to a new peak in popularity complete with photographs and illustrations as well as an appendix in the back with moves from key games the chess revolution is a seminal volume that will captivate every chess fan from novices to grandmasters

i feel privileged that the j h advances in computer games conference acg 10 takes place in graz styria austria it is the first time that austria acts as host country for this

major event the series of conferences started in edinburgh scotland in 1975 and was then held four times in england three times in the netherlands and once in germany the acg 10 conference in graz is special in that it is organised together with the 11th world computer chess championship wccc the sth computer olympiad co and the european union youth chess championship the 11 th wccc and acg 10 take place in the dom im berg dome in the mountain a high tech space with multimedia equipment located in the schlossberg in the centre of the city the help of many sponsors large and small is gratefully acknowledged they will make the organisation of this conference a success in particular i would like to thank the european union for designating graz as the cultural capital of europe 2003 there are 24 accepted contributions by participants from all over the world europe japan usa and canada the specific research results of the acg 10 are expected to find their way to general applications the results are described in the pages that follow the international stature together with the technical importance of this conference reaffirms the mandate of the international computer games association icga to represent the computer games community

this book includes a selection of papers from the 2018 world conference on information systems and technologies worldcist 18 held in naples italy on march 27-29 2018 worldcist is a global forum for researchers and practitioners to present and discuss recent results and innovations current trends professional experiences and the challenges of modern information systems and technologies research together with their technological development and applications the main topics covered are a information and knowledge management b organizational models and information systems c software and systems modeling d software systems architectures applications and tools e multimedia systems and applications f computer networks mobility and pervasive systems g intelligent and decision support systems h big data analytics and applications i human computer interaction j ethics computers security k health informatics l information technologies in education m information technologies in radiocommunications n technologies for biomedical applications
