this book presents the proceedings of the 4th international conference on internet of things and connected technologies (ICIoTCT) held on May 9-10, 2019 at Malaviya National Institute of Technology (MNNIT) Jaipur, India. The Internet of Things (IoT) promises to usher in a revolutionary, fully interconnected smart world with relationships between objects and their environment and objects and people becoming more tightly intertwined. The prospect of the Internet of Things as a ubiquitous array of devices bound to the Internet could fundamentally change how people think about what it means to be online. The ICIoTCT 2019 conference provided a platform to discuss advances in Internet of Things (IoT) and connected technologies such as various protocols and standards. It also offered participants the opportunity to interact with experts through keynote talks, paper presentations, and discussions, and as such stimulated research with the recent adoption of a variety of enabling wireless communication technologies like RFID tags, BLE, Zigbee, embedded sensor and actuator nodes, and various protocols such as CoAP, MQTT, and DNS. IoT has moved on from its infancy today smart sensors can collaborate directly with machines to automate decision

making or to control a task without human involvement further smart technologies including green electronics green radios fuzzy neural approaches and intelligent signal processing techniques play an important role in the development of the wearable healthcare devices
