it is hardly possible to read aristotle s poetics today without acknowledging the influence of its reception history our understanding of aristotle s poetical theory has been reshaped in past decades thanks to a reappraisal of long held prejudices whose history may be no less fascinating to explore than the text of the poetics itself to grasp what the poetics has to say therefore involves questioning what its many readers have been looking after what was the poetics used for and what are we using it for now into which bodies of texts has it been incorporated and put into perspective how have these uses and contexts influenced past readings of the poetics and how do they still inform the way we read it

no twentieth century writer has achieved greater literary success than Ernest Hemingway. His early days in journalism resulted in his trademark lean prose and a compelling writing style that would influence generations of writers to come. A larger than life figure, the author pursued adventures that would provide the groundwork for compelling tales of wars, bullfights, and safaris. This insightful guide provides excerpts, quotes, and critical analysis of Hemingway's novels and short stories in the context of his fascinating and ultimately tragic personal life. Through an in-depth exploration of some of his greatest works, readers will gain a greater understanding of this literary giant.

The Handbook on the Economics of Giving, Reciprocity, and Altruism provides a comprehensive set of reviews of literature on the economics of nonmarket voluntary transfers. The foundations of the field are reviewed first with a sequence of chapters that present the hard core of the theoretical and empirical analyses of giving, reciprocity, and altruism in economics, examining their relations with the viewpoints of moral philosophy, psychology, sociobiology, sociology, and economic anthropology. Secondly, a comprehensive set of applications are considered of all the aspects of society where nonmarket voluntary transfers are significant: family and intergenerational transfers, charity and charitable institutions, the nonprofit economy, interpersonal relations in the workplace, the welfare state, and international aid. Every volume contains contributions from leading researchers. Each handbook presents an accurate, self-contained survey of a particular topic. The series provides comprehensive and accessible surveys.

Feminists Doing Ethics is the debut title in the new Rowman Littlefield series *Feminist Constructions*. In this thoughtful collection, contributors refashion essays from the International Conference on Feminist Ethics, *Feminist Ethics Revisited* (October 1999), with an aim to critique social practice and develop an ethics of universal justice. The essays in this exciting volume explore the intricacies and impact of reasoned moral action, the virtues of character, and the empowering responsibility that morality generates. *Feminists Doing Ethics* brings to light concepts and ideas that are intended to extend our understanding of morality and of ourselves.

This is a collection of critical essays that integrate literature and ideas. Daniel Fuchs presents the writer's individuality as artist and thinker, focusing on the writer's interaction within a wide range of cultural, political, and historical periods and situations representative of the modern period. The essays reflect a progression that goes beyond chronology or historical survey in the consistency and interrelation of the literary and cultural themes explored and the references within them. The book is built around writers who are of central concern to the author; it does not pretend to be a comprehensive framework for analyzing modernism. Fuchs first deals with high modernism in discussions of Hemingway and Stevens, who in different ways critique tradition and collapsing values. The essays that follow deal with the contemporary, and here the focus is mainly on American Jewish writers and their cultural impact after modernism. The author's stance is in relation not only to these traditions but to others that might be thought antagonistic: the formalism of the New Critics and the deconstructionism that reduces the author to a replaceable variable in the dialects of cultural power relations. Fuchs pays tribute to the former, illustrating wider points in literary, socio-cultural, and political history. The overall emphasis on

these extrinsic matters underscores the book's appeal to a wide audience
