in this issue of infectious disease clinics of north america guest editors drs emily sydnor spivak and sage greenlee bring their considerable expertise to the topic of antimicrobial stewardship where we have come and where we are going throughout the last decade the field of antimicrobial stewardship has undergone exponential growth due to heightened awareness of antimicrobial use and emerging multidrug resistant organisms additionally the covid 19 pandemic highlighted systemic and persistent health disparities in the united states in this issue top experts provide a recap of

the progress made over the last decade in antimicrobial stewardship and provide direction for next steps in this ever growing field contains 12 practice oriented topics including antimicrobial stewardship and pandemic preparedness lessons learned from covid 19 health equity considerations antimicrobial stewardship at transitions of care antimicrobial stewardship in immunocompromised populations health system and tele antimicrobial stewardship the role of building networks and more provides in depth clinical reviews on antimicrobial stewardship offering actionable insights for clinical practice presents the latest information on this timely focused topic under the leadership of experienced editors in the field authors synthesize and distill the latest research and practice guidelines to create clinically significant topic based reviews

1 introduction to healthcare associated infections 2 structural organization of an infection control program 3 major healthcare associated infection types 4 surveillance of healthcare associated infections 5 standard precautions i hand hygiene 6 standard precautions ii personal protective equipment 7 transmission based precautions 8 infection control in special situations 9 disinfection policy 10 central sterile supply department 11 environmental surveillance 12 screening for multidrug resistant organisms 13 infection control in laundry 14 infection control in kitchen and food safety 15 waste management in healthcare facility 16 staff health issues i needle stick injury management 17 staff health issues ii work restriction and vaccination 18 outbreak investigation 19 antimicrobial stewardship 20 infection control requirements for accreditation index

clinical investigation plays an essential role in the differential diagnosis biomarker development and therapy and cure of diseases the book presents a bench to bed approach with broad empirical coverage by experienced practitioners the articles include topics like cytokine receptors in lung cancer conduciveness of oxidative stress to carcinogenesis safety and effectiveness of surgical correction of deformed chest diagnostic and treatment regimens in inflammation ridden obstructive lung conditions alterations in growth hormone secretion leading to disorders of growth and metabolism microbiota transplantation in pediatric patients and the promising markers of renal epithelial injury yet another issue concerns the restructuring of chronic pain management by establishing the community based specialized pain clinics the book aims to disseminate and deliberate on the latest interdisciplinary medical knowledge to enhance clinical outcomes being a blend of clinical investigation and practice the book is addressed to physicians scientists and allied health care professionals

drug utilization research dur is an eclectic scientific discipline integrating descriptive and analytical methods for the quantification understanding and evaluation of the processes of prescribing dispensing and consumption of medicines and for the testing of interventions to enhance the quality of these processes the discipline is closely related and linked mainly to the broader field of pharmacoepidemiology but also to health outcomes research

pharmacovigilance and health economics drug utilization research is a unique practical guide to the assessment and evaluation of prescribing practices and to interventions to improve the use of medicines in populations edited by an international expert team from the international society for pharmacoepidemiology ispe dur is the only title to cover both the methodology and applications of drug utilization research and covers areas such as health policy specific populations therapeutics and adherence

the first book was on theory and practice of antibiotic stewardship in its broadest sense the how to do it and the do s and don ts the second on controlling resistance was very much on the relationships between use and resistance and beginning to home in on the hospital as the main generator of resistance but mainly looking at it from a disease clinical perspective the last 3 chapters on mrsa ended where the 3rd book will take off controlling hai will concentrate on specific mdr organisms highlighting their roles in the current pandemic of hai and emphasizing that the big issue is not so much infection control but antibiotic control in the same way that antibiotic over reliance over use has caused the problem in the first place up till now the emphasis for controlling mrsa c diff and all the other mdros has very much been on ic which clearly isn t working this book will gather all the evidence for the increasingly popular view that much more must be done in the area of antibiotic policies stewardship especially when we are in danger of a post antibiotic era due to a real shortage of new agents in the pipeline

offering unparalleled coverage of infectious diseases in children and adolescents feigin cherry s textbook of pediatric infectious diseases 8th edition continues to provide the information you need on epidemiology public health preventive medicine clinical manifestations diagnosis treatment and much more this extensively revised edition by drs james cherry gail j demmler harrison sheldon l kaplan william j steinbach and peter j hotez offers a brand new full color design new color images new guidelines and new content reflecting today s more aggressive infectious and resistant strains as well as emerging and re emerging diseases discusses infectious diseases according to organ system as well as individually by microorganisms placing emphasis on the clinical manifestations that may be related to the organism causing the disease provides detailed information regarding the best means to establish a diagnosis explicit recommendations for therapy and the most appropriate uses of diagnostic imaging features expanded information on infections in the compromised host immunomodulating agents and their potential use in the treatment of infectious diseases and ebola virus contains hundreds of new color images throughout as well as new guidelines new resistance epidemiology and new global health milestones includes new chapters on zika virus and guillain barré syndrome expert consulttm ebook version included with purchase this enhanced ebook experience allows you to search all of the text figures and references from the book on a variety of devices
