distance learning is for leaders practitioners and decision makers in the fields of distance learning e learning telecommunications and related areas it is a professional journal with applicable information for those involved with providing instruction to all kinds of learners of all ages using telecommunications technologies of all types stories are written by practitioners for practitioners with the intent of providing usable information and ideas articles are accepted from authors new and experienced with interesting and important information about the effective practice of distance teaching and learning distance learning is published quarterly each issue includes eight to ten articles and three to four columns including the highly regarded and finally column covering recent important issues in the field and written by distance learning editor michael simonson articles are written by practitioners from various countries and locations nationally and internationally

essays on the challenges and risks of designing algorithms and platforms for children with an emphasis on algorithmic justice learning and equity one in three internet users worldwide is a child and what children see and experience online is increasingly shaped by algorithms though children s rights and protections are at the center of debates on digital privacy safety and internet governance the dominant online platforms have not been constructed with the needs and interests of children in mind the editors of this volume mizuko ito remy cross karthik dinakar and candice odgers focus on

understanding diverse children's evolving relationships with algorithms, digital data, and platforms and offer guidance on how stakeholders can shape these relationships in ways that support children's agency and protect them from harm. This book includes essays reporting original research on educational programs in AI, relational robots, and Scratch programming; on children's views on digital privacy and artificial intelligence; and on discourses around educational technologies. Shorter opinion pieces add the perspectives of an instructional designer, a social worker, and parents. The contributing social, behavioral, and computer scientists represent perspectives and contexts that span education, commercial tech platforms, and home settings. They analyze problems and offer solutions that elevate the voices and agency of parents and children. Their essays also build on recent research examining how social media, digital games, and learning technologies reflect and reinforce unequal childhoods.
