efforts by governments to influence the public in other countries have existed for some time though the concept of public diplomacy emerged in the 1960s the advent of ict has given powerful impetus to this particular way of conducting international relations increasingly governments lost their quasi monopoly on the control of information to the benefit of public opinion and non state actors who then does public diplomacy belong to how is the task divided what are the responsibilities of government officials what is the role of non state actors how can one measure the power of the media this publication is designed for diplomats but is also a must have for anyone keen to explore this area in depth

this text is a distinctly post cold war learning tool that will help make sense of the rapid changes now taking place in international relations the author s goal is to contribute to an understanding of a world more willing to abide by rules and norms especially as expressed in international law and a world shifting to an emphasis on the soft power of economic influence rather than relying on the hard power of military force while this text is cautiously optimistic about humankind s future as we enter the 21st century it warns about continuing turbulence caused by terrorism rogue states intense trade competition ethnic conflict and the antagonism between rich and poor states the chapters are tied together with an overarching theme that argues the world is moving from an international anarchy based on fear and military power to the early stages of an international society comprised of

multiple actors cooperating to solve problems they handle on their own
