over the past few years piracy has once again the scourge of the high seas throughout 2008 close to 90 ships were seized in the gulf of aden alone and in many cases the pirates were paid million dollar ransoms to release them what is the reason for this modern day phenomenon and just who are the men behind it what started as a patrol to combat commercial plundering of somali fish stocks has now grown into a highly organised and lucrative business in a war torn country the pirates have brought hope and entire villages depend on the wealth that they bring in they have even been likened to robin hood but these modern day buccaneers should not be romanticised their attacks are becoming more violent and they are increasingly in possession of automatic weapons and rocket propelled grenades in this fascinating book nigel cawthorne examines how a phenomenon thought to be consigned to history is once again a worldwide problem piracy is rife in the south china sea and has returned to the caribbean and south america the author also looks at attacks that have taken place in the malacca straits and the fate of the couple making a once in a lifetime trip around the world by yacht plus he questions how the international community and its peace keeping forces can try to bring stability and security back to the oceans of the world

time and world in the current global village concern everybody and everyone whether young or old must pay at least some attention to correctly gauge the prevailing winds blowing in and around the world at that time the complex nature of the time and the world is very difficult to untangle and hopelessly mired in depths we may not know or things of which we have got no comprehension in this book i have tried to summarize events situations personalities and at occasions a few stories that bring deeper comprehension of the world and its affairs in the larger canvas of the political and cultural dynamics of the time and their interplays as i see them in moving the world forward the topics on which i wrote were all topics on which i felt rather strongly about or topics that i felt important i hope they are enjoyed and appreciated by all those who read them while writing the book i was often tempted to add my own comments about what i felt about the issue at hand but in the end i successfully resisted such temptations and restricted myself to the truth as i saw it so this book is a publication on world affairs with just occasional comments of universal nature here and there another problem i encountered while writing this book was

the abundance of materials to select from several events of recent origin raced through my mind for space but i had to be choosy to limit myself to the planned format of my book further recent developments are too recent and hot to gauge dispassionately and earn space for objective analyses therefore i avoided such materials as much as possible in this volume this holds true about india also though this book is india centric in world affairs i avoided all opinions and comments on india related matters for the fear of being partisan this volume is not planned as a platform for such contents nec dextrorsum nec sinistrorsum is the theme here and i tried my best to maintain it often i had been tempted to stray into topics quite unrelated to the theme of the book managing it and keeping my course on the track was the toughest part of my work my time my world opened up limitless vista for entry again i succeeded in confining myself to my lakshmana rekha

the book explores the central question facing humanity today how can we best survive the ten great existential challenges that are now coming together to confront us besides describing these challenges from the latest scientific perspectives it also outlines and integrates the solutions both at global and individual level and concludes optimistically this book brings together in one easy to read work the principal issues facing humanity it is written for the two next generations who will have to deal with the compounding risks they inherit and which flow from overpopulation resource pressures and human nature the author examines ten intersecting areas of activity mass extinction resource depletion wmd climate change universal toxicity food crises population and urban expansion pandemic disease dangerous new technologies and self delusion which pose manifest risks to civilization and potentially to our species long term future this isn t a book just about problems it is also about solutions every chapter concludes with clear conclusions and consensus advice on what needs to be done at global level but it also empowers individuals with what they can do for themselves to make a difference unlike other books it offers integrated solutions across the areas of greatest risk it explains why homo sapiens is no longer an appropriate name for our species and what should be done about it
