sensitivity analysis assesses the impact of changes in key variables eg cost estimates benefit projections on the NPV This helps understand the robustness of the CBA results A thorough risk assessment should also be conducted to identify potential risks and their likelihood and develop mitigation strategies Interpreting the Results and Making Informed Decisions The CBA results should be presented clearly and concisely avoiding technical jargon Management should consider the NPV IRR and Payback Period along with the qualitative aspects of the Boardman solution The analysis should not be the sole basis for the decision but rather a crucial input informing a broader strategic evaluation Key Takeaways A comprehensive CBA is essential for evaluating the financial viability of Boardman solutions Thoroughly identify and quantify both tangible and intangible costs and benefits Use appropriate discounting techniques to account for the time value of money Conduct sensitivity analysis and risk assessment to understand the robustness of the results Consider the CBA alongside other strategic factors when making implementation decisions Frequently Asked Questions FAQs 1 What if I cant quantify all the benefits Focus on quantifying the most significant benefits and qualitatively assess the remaining intangible benefits Clearly document the limitations of the analysis 2 How do I deal with uncertainty in cost and benefit projections Conduct a sensitivity analysis to assess the impact of variations in key variables on the NPV Consider using probabilistic methods to incorporate uncertainty directly into the analysis 3 What discount rate should I use The discount rate reflects the opportunity cost of capital It should reflect the risk associated with the Boardman solution and the organizations cost of capital 4 What if the CBA shows a negative NPV This suggests the solution isnt financially viable in its current form Explore options to reduce costs enhance benefits or reconsider the project altogether 5 Can I use a CBA for comparing different Boardman solutions Yes a CBA is a powerful tool for comparing competing solutions Ensure that the analysis uses a consistent methodology 4 and timeframe for all alternatives This allows for a direct comparison based on their relative NPVs and other metrics
