these are my lecture notes from cs681 design and analysis of algorithms a one semester
graduate course i taught at cornell for three consecutive fall semesters from 88 to 90 the
course serves a dual purpose to cover core material in algorithms for graduate students in
computer science preparing for their phd qualifying exams and to introduce theory students
to some advanced topics in the design and analysis of algorithms the material is thus a
mixture of core and advanced topics at first i meant these notes to supplement and not

supplant a textbook but over the three years they gradually took on a life of their own in addition to the notes i depended heavily on the texts a v aho j e hopcroft and j d ullman the design and analysis of computer algorithms addison wesley 1975 m r garey and d s johnson computers and intractability a guide to the theory of np completeness w h freeman 1979 r e tarjan data structures and network algorithms siam regional conference series in applied mathematics 44 1983 and still recommend them as excellent references
