1 Overheads Definition and Types

11 Definition Overheads refer to indirect expenses incurred in the production process that cannot be directly attributed to specific units of output These expenses are necessary for the operation of the business but do not directly contribute to the creation of a product or service

12 Types of Overheads

Overheads can be broadly categorized as follows

- Manufacturing Overheads** Expenses related to the production process such as factory rent utilities machinery depreciation and indirect labor
- Administrative Overheads** Expenses associated with the overall management of the business including salaries of administrative staff office rent and stationery
- Selling and Marketing Overheads** Expenses related to promoting and distributing products or services such as advertising sales commissions and transportation costs

2 Problems Associated with Cost Accounting Overheads

21 Overallocation of Overheads

This occurs when overheads are assigned to products or services in a way that doesn't accurately reflect their actual consumption This can lead to distorted cost estimates and incorrect pricing decisions

22 Underallocation of Overheads

Conversely underallocation of overheads happens when the allocation mechanism fails to capture all the relevant costs This can underestimate the true cost of production and erode profitability

23 Difficulty in Identifying and Tracking Overhead Costs

Overheads often involve numerous small and seemingly insignificant expenses Tracking these costs accurately can be challenging leading to inaccurate cost accounting

24 Fluctuations in Overhead Costs

Overheads are frequently influenced by external factors like market conditions economic fluctuations and changes in regulations These unpredictable fluctuations can make it difficult to predict future overhead costs
