today's clinical social workers face a spectrum of social issues and problems of a scope and severity hardly imagined just a few years ago and an ever widening domain of responsibility to overcome them. *Theory and Practice in Clinical Social Work* is the authoritative handbook for social work clinicians and graduate social work students that keeps pace with rapid social changes and presents carefully devised methods, models, and techniques for responding to the needs of an increasingly diverse clientele. Following an overview of the principal frameworks for clinical practice including systems theory, behavioral and cognitive theories, psychoanalytic theory, and neurobiological theory, the book goes on to present the major social crises, problems, and new populations the social work clinician confronts each day. *Theory and Practice in Clinical Social Work* includes 29 original chapters, many with carefully crafted and detailed clinical illustrations, by leading social work scholars and master clinicians who represent the widest variety of clinical orientations and specializations. Collectively, these leading authors have treated nearly every conceivable clinical population in virtually every practice context. Using a full array of treatment approaches and modalities, included in this volume are chapters on practice with adults and children, clinical social work with adolescents, family therapy, and children's treatment groups. Other chapters focus on social work with communities affected by disasters and terrorism, clinical case management, cross-cultural clinical practice, psychopharmacology, practice with older adults, and mourning and loss. The extraordinary breadth of coverage will make this book an essential source of information for students in advanced practice courses and practicing social workers alike.

the interest of the writers of these essays in the intricacies and implications of translation in the middle ages or of the translation of medieval texts in the modern period has resulted in a diverse and intellectually stimulating volume. The papers in this volume, written in either English, French, or Spanish, approach translation from a wide variety of perspectives and offer a range of interpretations of the concept of translation. The volume contains essays ranging in time from the Anglo-Saxon period to the present and in topic from medieval recipe books to arguments in favour of women administering the sacrament. Languages studied include non-European languages as well as Latin and numerous European vernaculars as both source and target languages. As any translator or student of translation quickly becomes aware, it is impossible to divorce language from culture. All the contributors to this volume struggle with the complexities of translation as a cultural act, even when the focus would seem to be specifically linguistic. It is these complexities which lend the study of the theory and practice of translation in the middle ages its enduring fascination.
