human behavior and decision making is subject to social and motivational influences such as emotions norms and self other regarding preferences the identification of the neural and psychological mechanisms underlying these factors is a central issue in psychology behavioral economics and social neuroscience with important clinical social and even political implications however despite a continuously growing interest from the scientific community the processes underlying these factors as well as their ontogenetic and phylogenetic development have so far remained elusive in this research topic we collect articles that provide challenging insights and stimulate a fruitful controversy on the question of what determines social behavior indeed over the last decades research has shown that introducing a social context to otherwise abstract tasks has diverse effects on social behavior on the one hand it may induce individuals to act irrationally for instance to refuse money but on the other hand it improves individuals reasoning in that formerly difficult abstract problems can be easily solved these lines of research led to distinct although not necessarily mutually exclusive models for socially driven behavioral changes for instance a popular theoretical framework interprets human behavior as a result of a conflict between cognition and emotion with the cognitive system promoting self interested choices and the emotional system triggered by the social context operating against them other theories favor social norms and deontic heuristics in biasing human reasoning and encouraging choices that are sometimes in conflict with one's interest few studies attempted to disentangle between these as well as other models as a consequence although insightful results arise from specific domains tasks a comprehensive theoretical framework is still missing furthermore studies employing neuroimaging techniques have begun to shed some light on the neural substrates involved in social behavior implicating consistently although not exclusively portions of the limbic system the insular and the prefrontal cortex in this context a challenge for present

research lies not only in further mapping the brain structures implicated in social behavior or in describing in detail the functional interaction between these structures but in showing how the implicated networks relate to different theoretical models this is research topic hosted by members of the swiss national center of competence in research affective sciences emotions in individual behaviour and social processes we collected contributions from the international community which extended the current knowledge about the psychological and neural structures underlying social behavior and decision making in particular we encouraged submissions from investigators arising from different domains psychology behavioral economics affective sciences etc implementing different techniques behavior electrophysiology neuroimaging brain stimulations on different populations neurotypical adults children brain damaged or psychiatric patients etc animal studies are also included as the data reported are of high comparative value finally we also welcomed submissions of meta analytical articles mini reviews and perspective papers which offer provocative and insightful interpretations of the recent literature in the field

to date scholars have skilfully discussed aspects of polqar s thought and yet none of the existing studies offers a comprehensive examination that covers polqar s thought in its entirety this book aims to fill this lacuna by tracing and contextualizing both polqar s islamic sources al fārābī avicenna and averroes and his jewish sources maimonides and isaac albalag the study brings to light three of polqar s main purposes 1 seeking to defend judaism as a true religion against christianity 2 similarly to his fellow jewish averroists polqar wishes to defend the discipline of philosophy by philosophy polqar means averroes interpretation of aristotle as a consequence he offers an averroistic interpretation of judaism and becomes one of the main representatives of jewish averroism 3 defending his philosophical interpretation of judaism from a social and political point of view polqar s unreserved embrace of philosophy raised problems within the jewish community he had to refute the jewish traditionalists charge that he was a heretic led astray by philosophy the main objective guiding this study is that polqar advances a systematic naturalistic interpretation of judaism which in many cases does not agree with traditional jewish views haliva s lucid learned and incisive monograph on the thought of isaac polqar is the first comprehensive study devoted to this important but neglected fourteenth century jewish averroist it makes a significant contribution to our knowledge of post maimonidean medieval jewish philosophy haliva convincingly shows that while polqar claims to follow maimonides he consistently pushes his thought in a more radical direction offering a severely naturalistic interpretation of jewish religious principles and refusing to make any concessions to more traditional theological modes of thought her study leads us to ask whether it is possible to uphold such an uncompromising philosophical and naturalistic reading of judaism as that of polqar that is whether it does justice to the jewish religious principles it purports to interpret and enables us to maintain the authority of traditional halakhah lawrence j kaplan mcgill university montreal racheli haliva s excellent book is the first comprehensive study of the philosophy of isaac polqar late thirteenth early fourteenth century polqar emerges as a radical and creative thinker a fascinating link between the

philosophy of averroes and maimonides and that of spinoza warren zev harvey hebrew university of jerusalem haliva s groundbreaking book is the first comprehensive study of polqar s intellectual world forged in the crucible of the late middle ages where greco arabic philosophy and the maimonidean legacy meet inner jewish and anti christian polemics polqar haliva demonstrates was a formidable thinker in his own right who critically engages with maimonides and averroes at the same time he defends the jewish faith as the only true religion of reason against kabbalists and jewish traditionalists and against his former teacher abner of burgos whose conversion to christianity was a major intellectual shock this is a meticulously researched and lucidly argued scholarly contribution that fills a crucial gap in the history of jewish philosophy carlos fraenkel mcgill university montreal
