the predominant positive view among philosophers and scientists alike is that consciousness is something realized in brain activity this view however largely fails to capture what consciousness is like according to how it shows itself to conscious beings what this work proposes instead is that consciousness is a

phenomenon that exists in and throughout the body apart from whether or not it involves intentionality and apart from whether or not it involves awareness of the self consciousness is self intimating self revealing self disclosing self disclosure is the definitive phenomenological character of consciousness in all its forms taking this stance as a point of departure the book presents a specific account of what bodily field phenomenon consciousness is in this way the current stalemate in philosophy over the question of the physical reality of consciousness is broken series a

in recent decades with advances in the behavioral cognitive and neurosciences the idea that patterns of human behavior may ultimately be due to factors beyond our conscious control has increasingly gained traction and renewed interest in the age old problem of free will in this book gregg d caruso examines both the traditional philosophical problems long associated with the question of free will such as the relationship between determinism and free will as well as recent experimental and theoretical work directly related to consciousness and human agency he argues that our best scientific theories indeed have the consequence that factors beyond our control produce all of the actions we perform and that because of this we do not possess the kind of free will required for genuine or ultimate responsibility it is further argued that the strong and pervasive belief in free will which the author considers an illusion can be accounted for through a careful analysis of our phenomenology and a proper theoretical understanding of consciousness indeed the primary goal of this book is to argue that our subjective feeling of freedom as reflected in the first person phenomenology of agentive experience is an illusion created by certain aspects of our consciousness

the relation between body and mind has presented philosophy with its perennial problem it exercised the minds of plato and aristotle and it was implicit in the thought if not always present to the minds of the presocratics in modern philosophy it became explicit in descartes s meditations and remained central to the deliberations of every subsequent philosopher of any significance from hobbes to hume from spinoza to hegel and from husserl and heidegger to russell and whitehead from whatever angle one approaches philosophy one cannot avoid this problem moral philosophy both ethical and political compels one to adopt some conception of human nature its origins and status within the world for one cannot decide on the best way to live without considering the impact of natural influences on the human condition and of human behaviour on nature including other humans and these considerations at once raise the question of the relation of the human mind to nature and the natural body it enlightens a philosophy of nature must include the place of humanity in the natural scheme not only the human body but also the knowing mind metaphysics cannot be divorced from epistemology nor can that neglect the part played in the acquisition of knowledge by the bodily senses and clearly a philosophy of mind must include some vision of the relation of the mind to the body it inhabits

while the philosophical discussion of zen spirituality reaches its limit poetry offers an effective expression of the sublime experiences from a poetic perspective enlightenment is understood as poetic leaps in the spiritual journey which brings people from the habitually or conventionally established world toward new horizons of consciousness this leap is a breakthrough in the overall consciousness rather than a progression in contemplative thought therefore it cannot be adequately described through abstract representation but poetry can metaphorically capture this leap and reveal both the spiritual meaning and the practical wisdom of enlightenment this book will take you on this fantastic journey of enlightenment

heaven s gate a secretive group of celibate monks awaiting pickup by a ufo captured intense public attention in 1997 when its members committed collective suicide as a way of understanding such perplexing events many have seen those who join cults as needy lost souls unable to think for themselves this book a compelling look at the cult phenomenon written for a wide audience dispels such simple formulations by explaining how normal intelligent people can give up years of their lives and sometimes their very lives to groups and beliefs that appear bizarre and irrational looking closely at heaven s gate and at the democratic workers party a radical political group of the 1970s and 1980s janja lalich gives us a rare insider s look at these two cults and advances a new theoretical framework that will reshape our

understanding of those who join such groups. Lalich's fascinating discussion includes her in-depth interviews with cult devotees as well as reflections gained from her own experience as a high-ranking member of the democratic workers party incorporating classical sociological concepts such as charisma and commitment with more recent work on the social psychology of influence and control. She develops a new approach for understanding how charismatic cult leaders are able to dominate their devotees. She shows how members are led into a state of bounded choice in which they make seemingly irrational decisions within a context that makes perfect sense to them and is in fact consistent with their highest aspirations. In addition to illuminating the cult phenomenon in the United States and around the world, this important book also addresses our pressing need to know more about the mentality of those true believers who take extreme or violent measures in the name of a cause.
