in the late 2000s when the oil sands industry proposed expanding its capacity to transport fossil fuel products an unprecedented coalition of indigenous nations and communities environmental non governmental organizations grassroots groups and municipal governments mobilized in response mega pipelines mega resistance explores how these social movements challenged powerful corporate and government interests and reshaped the politics of energy infrastructure amy janwood investigates campaign coalitions that were formed to oppose two mega pipeline projects the expansion of trans mountain which was ultimately completed and northern gateway which was never built drawing on a wide array of documents and in depth insider interviews with oil executives senior government officials coalition organizers and lawyers she analyzes the strategic alliances and tactics that have empowered and attempted to thwart these movements mega pipelines mega resistance is an ambitious study that underscores the power of campaign coalitions to sustain resistance influence government policy and shape industry decisions

this timely collection of essays examines the legal and regulatory dynamics of energy transitions in the context of emerging trends towards decarbonisation and low carbon energy solutions the book explores this topic by considering the applicable energy law and policy frameworks in both i highly industrialised and major economies such as the us eu china and australia ii resource rich developing countries such as nigeria and regions like southern africa comprising 16 chapters the book delves into the tradeoffs and regulatory complexities of carbon constraints in conventional energy supply systems while maintaining a reliable and secure energy system that is equally sustainable ie decarbonised it highlights the importance of ensuring affordable access to energy services in developing economies as the energy transitions unfold and explores the potentials of emerging technologies such as hydrogen networks power to gas and carbon capture and storage additionally the book also considers the international investment law implications of energy

decarbonisation focusing on the nexus between law regulation and institutions it adopts a contextual approach to examine how and to what extent institutions can effectively facilitate more reliable sustainable and secure energy supply systems in the twenty first century this book portrays the conventional hydrocarbon based energy supply industry in a largely international and interconnected context it highlights the costs benefits and losses that may arise as the transition towards decarbonisation unfolds depending on the pathways and solutions adopted with chapters written by leading experts in energy law and policy the reader friendly style and engaging discussions will benefit an international audience of policymakers academics students and advisers looking for a more incisive understanding of the issues involved in energy transitions and the decarbonisation of energy systems

canada s economic and social development has benefited immensely from centuries of marine shipping today the industry supports economies from coast to coast to coast shipping hundreds of millions of tonnes of cargo ranging from fuels to food to consumer goods lining store shelves the shipping industry is important to the livelihood of canadians but has also faced increased public scrutiny in recent years the risks associated with opening the arctic to greater ship traffic increasing marine shipments of oil from canada s oil sands and the growth in vessel size especially of container ships have all contributed to this discussion recognizing the need for consensus building research in this area the clear seas centre for responsible marine shipping asked the council of canadian academies to convene an expert workshop to identify the risks associated with commercial marine shipping in major canadian shipping regions the final workshop report commercial marine shipping accidents understanding the risks in canada identifies the risks of commercial marine shipping accidents across canada s regions and for different cargo types while highlighting gaps in understanding and areas for further research the workshop report brings together perspectives from academia government and industry and is informed by evidence from a survey of the marine shipping community and an extensive review of the existing literature it can be used as a tool for policy makers to help inform decisions related to managing the risks of commercial marine shipping accidents overall this workshop report seeks to contribute to a national dialogue about acceptable levels of risk in commercial marine shipping

when *economyths* was first published in 2010 david orrell showed how mainstream economics is based on key myths such as fair competition rational behaviour stability and eternal growth and how these myths lead paradoxically to their opposites inequality an irrational economy financial instability and a collision with nature s limits since then we ve had occupy political upheaval flash crashes in financial markets the warmest few years in recorded history and a growing chorus demanding fundamental reform so how has economics responded in this revised and expanded edition orrell shows how the ten myths still dominate economics he reveals their roots in thought that goes back to the ancient greeks making them hard to dislodge and he uncovers demolishes and develops an alternative to the greatest *economyth* of all the one that will lead to the collapse of orthodox economics

in the wake of world war i british attempts to exclude american oil companies from iraq and persia caused serious strains in anglo american relations in may 1921 an oil entente was reached that granted american oil companies an open door and equal opportunity in iraq and in return america acknowledged british domination of persia and monopoly of its oil this entente was soon tested when persians gave an oil concession to the sinclair oil company of new york and tried to rid themselves of the recently installed pahlavi dictatorship it was in the midst of this unrest in may of 1924 that american vice consul robert imbrie arrived in tehran almost immediately after his arrival imbrie began sending reports to washington that were highly critical of the british policies in persia on july 18 1924 imbrie was brutally murdered in tehran supposedly by a mob of religious fanatics to save face and avoid international complications the u s government accepted the persian government s version of the killing in this detailed examination of anglo american american persian and anglo persian relations author mohammad gholi majd argues that imbrie was in fact the victim of a conspiracy using records of the u s department of state this text examines how the murder enabled britain to maintain its monopoly of persian oil and further consolidate the pahlavi dictatorship the killing of imbrie ultimately facilitated the consummation of the anglo american oil entente

this book investigates the impact of the covid 19 pandemic on the health and well being of indigenous peoples and assesses the policy responses taken by governments
