planning and evaluating curriculum from a theoretical practical point of view

this text offers a readable and friendly presentation of the important methods  
findings and theories of human aging while actively involving the reader in  
meaningful exercises and critical thinking students are repeatedly challenged to  
apply information in the text to the older adults in their own lives specifically  
suggestions for enhancing the lives of their older relatives are offered and  
encouraged these include guidelines for discussions they might have regarding  
social emotional and environmental changes as well encouraging intellectual  
and social interaction in this edition emphasis on the science of the study of  
aging and why questions in aging are difficult to answer how social scientists  
attempt to handle such difficulties and the successes and failures social  
scientists have had thus far in answering those questions the text also  
demonstrates how current research findings are now being applied in the real  
world and or how they might be applied in the future cross cultural comparisons  
and ethnic group comparisons are included wherever possible each chapter  
begins with senior view which introduces students to a real person and gives  
them a chance to hear what older adults think and say about important issues

related to the chapter and a chance to compare those opinions to the research findings each chapter ends with making choices emphasizing the important behavioral emotional and social choices that students can make now to prolong a healthy happy life chapter projects offer the opportunity for active learning as students investigate for themselves an issue related to the chapter instructors can expand these projects for students who want to learn more or for independent study focus on aging boxes compliment the material in the text providing additional insight and examples and encouraging critical thinking every chapter includes discussion questions study questions chapter exercises and related online resources

budgets of governments and private insurances are limited not all drugs and services that appear beneficial to patients or physicians can be covered is there a core set of benefits that everyone should be entitled to if so how should this set be determined are fair decisions just impossible if we know from the outset than not all needs can be met while early work in bioethics has focused on clinical issues and a narrow set of principles in recent years there has been a marked shift towards addressing broader population level issues requiring consideration of more demanding theories in philosophy political science and economics at the heart of bioethics new orientation is the goal of clarity on a complex set of questions in rationing and resource allocation rationing and resource allocation in healthcare essential readings provides key excerpts from seminal and pertinent texts and case studies about these topics contextualized by original introductions the volume is divided into three broad sections conceptual distinctions and ethical theory rationing and resource allocation containing the most important and classic articles surrounding the theoretical and practical issues related to rationing and how to allocate scarce medical resources this collection aims to assist and inform those who wish to be a part of bioethics 21st century shift including practitioners and policy makers and students and scholars in the health sciences philosophy law and medical ethics
