what determines the focus of a researcher's interest the sources of inspiration for a study or the variables scrutinized if we were to examine the antecedents of these decisions they would surely emerge as accidents of circumstance the personal experiences of the researcher the inspiration of early mentors the influence of contemporary colleagues all tempered by the intellectual currents that nurture the researcher's hypotheses among the

accidents that mold the careers of researchers is geographic location the culture in which a research program emerges helps determine both its very subject and its method the primary purpose of this book is to assist those interested in the scientific study of children s social competence in transcending the boundaries imposed both by geography and by selective exposure to the highly diverse schools of thought that have led to interest in this field most of these ideas were presented and exchanged at an advanced study institute entitled social competence in developmental perspective held in savoie france in july 1988 this institute was attended by scholars from france england northern ireland germany italy norway spain portugal netherlands canada the united states and brazil those who participated will recognize that the metamorphosis from lecture to chapter has necessitated many changes in order to accommodate the reader who may be unfamiliar with the field more attention has been paid here to identifying the theoretical contexts of the research described

a new edition of this book is available this is an admirable modern textbook on child development which is compact beautifully organized and laid out and hence is easy to read and use it also incorporates all the pedagogic methods which one expects in good textbooks nowadays such as stating the aims of each chapter in bold at the beginning together with a useful summary in a text box and a glossary at the end of each chapter i was also very pleased to find that keenan had included much of the modern thinking about child development which so many other university level introductions seem so far to have neglected young minds this book is well written with a flowing narrative it provides an excellent coverage of methods and theories in developmental psychology j gavin bremer department of psychology lancaster university this outstanding textbook presents a comprehensive introduction to developmental psychology that is engaging yet detailed and thorough covering all the major topics in child development the book offers a grounding in the principles which govern research and theory in contemporary child development and surveys the theories and research methods which are essential to developing a firm knowledge of the field key features include coverage of the child s theory of mind under the rubric of social development an introduction to emotion regulation in the chapter on

emotional development coverage of some key theories such as dynamic systems theory and evolutionary psychology ideal for students taking a first course in child or lifespan development the book assumes little or no background in the subject
