Dempster Dieter Hattrup Rose Army Jürgen Neffe Hans Ludwig Ollig Arthur James Wells Bernd Goebel*

behe argues that the complexity of cellular biochemistry argues against darwin s gradual evolution

in this volume frank macchia offers a systematic theology written with christ s outpouring of the holy spirit from the heavenly father at pentecost as its dominant motif christ s death and resurrection provide for our reconciliation with god and make way for the spirit for the divine overflowing onto all flesh the church is born in the grace of that overflowing from the abundance of this divine self giving spring forth many different tongues aflame with the church s praise and witness this systematic theology seeks to join and further guide these tongues in their diverse contexts by reflecting in a coherent fashion across the spectrum of christian doctrine the first three chapters offer an extensive

treatment of modern approaches to theology subsequent chapters explore all of the major topics of importance to theology historically this is theology written from a pentecostal interest yet seeking to speak beyond it to a larger ecumenical horizon

they consistently find grandiose claims with no scientific merit

hugely enjoyable spectator a lucid elegantly written and thought provoking social and intellectual history evening standard as a historian trying to put darwin in the context of his time there is surely no better biographer than wilson the times a work of scholarship that is hard to put down deborah cadbury charles darwin the man who discovered evolution the man who killed off god or a flawed man of his age part genius part ruthless careerist who would not acknowledge his debts to other thinkers in this bold new life the first single volume biography in twenty five years a n wilson the acclaimed author of the victorians and god s funeral goes in search of the celebrated but contradictory figure charles darwin darwin was described by his friend and champion thomas huxley as a symbol but what did he symbolize in wilson s portrait both sympathetic and critical darwin was two men on the one hand he was a naturalist of genius a patient and precise collector and curator who greatly expanded the possibilities of taxonomy and geology on the other hand darwin a seemingly diffident man who appeared gentle and even lazy hid a burning ambition to be a universal genius he longed to have a theory which explained everything but was darwin s 1859 master work on the origin of species really what it seemed a work about natural history or was it in fact a consolation myth for the victorian middle classes reassuring them that the selfishness and indifference to the poor were part of nature s grand plan charles darwin victorian mythmaker is a radical reappraisal of one of the great victorians a book which isn t afraid to challenge the darwinian orthodoxy while bringing us closer to the man his revolutionary idea and the wider victorian age

over the past decade a strident public debate has arisen about the nature and origin of religions controversies include how exactly religion evolved whether by individual or group selection if it is adaptive and if not whether and how it is a side effect of evolution this volume focuses on the issue of naturalizing religion on the ways in which cognitive science and social sciences have treated religion as a natural phenomenon it questions whether religious behaviour institutions and experiences can be explained in natural terms the editor brings together some of the best published work on the definition of religion intelligent design and the evolution of religion

the scientist who has been dubbed the father of intelligent design and author of the groundbreaking book *Darwin's Black Box* contends that recent scientific discoveries further disprove darwinism and strengthen the case for an intelligent creator in his controversial bestseller *Darwin's Black Box* biochemist michael behe challenged darwin's theory of evolution arguing that science itself has proven that intelligent design is a better explanation for the origin of life in *Darwin Devolves* behe advances his argument presenting new research that offers a startling reconsideration of how darwin's mechanism works weakening the theory's validity even more a system of natural selection acting on random mutation evolution can help make something look and act differently but evolution never creates something organically behe contends that darwinism actually works by a process of devolution damaging cells in dna in order to create something new at the lowest biological levels this is important he makes clear because it shows the darwinian process cannot explain the creation of life itself a process that so easily tears down sophisticated machinery is not one which will build complex functional systems he writes in addition to disputing the methodology of darwinism and how it conflicts with the concept of creation behe reveals that what makes intelligent design unique and right is that it acknowledges causation evolution proposes that organisms living today are descended with modification from organisms that lived in the distant past but intelligent design goes a step further asking what caused such astounding changes to take place what is the reason or mechanism for evolution for behe this is what makes intelligent design so important

in his acclaimed book *God After Darwin* john haught argued that religious belief is wholly compatible with evolutionary biology now in *Deeper Than Darwin* he advances his argument further by saying that religious belief is even more revealing about life than darwinism haught looks hard at the question of how after darwin religions may plausibly claim to be bearers of truth and not just of meaning and adaptive consolation while he assumes the fundamental correctness of evolutionary biology he firmly rejects the non scientific belief that evolutionary biology amounts to an adequate explanation of living phenomena even though darwinism is illuminating haught argues it by no means tells us everything we need to know about life even in principle to find the deepest though certainly not the clearest understandings of life and the universe we may still profitably consult the religions of the world deeper than darwin takes up where *God After Darwin* left off arguing that darwin's vision is important and essentially correct but that we can still dig deeper in our understanding of what is going on in the life story

this aims to set the record straight on one of the most revered figures in natural history

fünf jahre erkundete charles darwin ab 1831 auf einem segelschiff der beagle die erde und revolutionierte mit seinen dabei gewonnenen erkenntnissen das bild vom leben er ging als gottesgläubiger und kehrte als begründer der evolutionstheorie zurück zum darwin jahr 2009 reist der preisgekrönte journalist und promovierte biologe jürgen neffe auf darwins spuren zu abgelegenen inseln durchstreift urwälder trifft indianer naturschützer und genforscher immer im sog der grundfrage nach dem geheimnis des lebens da lässt sich am strand von rio über sexuelle auslese nachdenken oder bei einem ritt durch patagonien über die natürliche zuchtwahl ein roadmovie über die erforschung des lebendigen

die trennlinie zwischen den naturalisten und ihren ausgesprochenen und unausgesprochenen gegnern ist eine der großen wasserscheiden der philosophie der immer mehr aufmerksamkeit zuteil wird die in diesem band versammelten aufsätze diskutieren die wichtigsten aspekte des gegenwärtigen streits um den naturalismus ihr spektrum reicht vom kritischen Überblick über die erscheinungsformen des naturalismus und seine problemfelder bis hin zum freiheitsproblem von der debatte um den biologismus in ethik und erkenntnistheorie bis zur hirnforschung von der anthropologie und ethik bis zum leib seele problem
