adolf hitler had high hopes for his conquest of norway which held both great symbolic and great strategic value for the fuhrer despite early successes however his ambitious northern campaign foundered and ultimately failed adam claasen for the first time reveals the full story of this neglected episode and shows how it helped doom the third reich to defeat hitler and raeder the chief of the german navy were determined to take and keep norway by doing so they hoped to preempt allied attempts to outflank germany protect sea lanes for german ships access precious scandinavian minerals for war production and provide a launchpad for luftwaffe and naval operations against great britain beyond those strategic objectives hitler also envisioned norway as part of a pan nordic stronghold a centerpiece of his new world order but as claasen shows hitler s grand expectations were never realized gring s luftwaffe was the vital spearhead in the invasion of norway which marked a number of wartime firsts among other things it involved the first large scale aerial operations over sea rather than land the first time operational objectives and logistical needs were fulfilled by air power and the first deployment of paratroopers although it got off to a promising start the german effort particularly against british and arctic convoys was greatly hampered by flawed strategic thinking interservice rivalries between the luftwaffe and navy the failure to develop a long range heavy bomber the diversion of planes and personnel to shore up the german war effort

elsewhere and the northern theater's harsh climate and terrain. Claassen's study covers every aspect of this ill-fated campaign from the 1940 invasion until war's end and shows how it was eventually relegated to a backwater status as Germany fought to survive in an increasingly unwinnable war. His compelling account sharpens our picture of the German air force and widens our understanding of the Third Reich's way of war.
