data and computer communications eighth edition offers a clear comprehensive and unified view of the entire fields of data communications networking and protocols william stallings organizes this massive subject into small comprehensible elements building a complete survey of the state of the art one piece at a time stallings has substantially revised this international best seller to reflect today s latest innovations from wifi and 10 gbps ethernet to advanced congestion control and ip performance metrics book jacket

essentials of computer organization and architecture focuses on the function and design of the various components necessary to process information digitally this title presents computing systems as a series of layers taking a bottom up approach by starting with low level hardware and progressing to higher level software its focus on real world examples and practical applications encourages students to develop a big picture understanding of how essential organization and architecture concepts are applied in the computing world in addition to direct correlation with the acm iee guidelines for computer organization and architecture the text exposes readers to the inner workings of a modern digital computer through an integrated presentation of fundamental concepts and principles

what every electrical engineering student and technical professional needs to know about data exchange across networks while most electrical engineering students learn how the individual components that make up data communication technologies work they rarely learn how the parts work together in complete data communication networks in part this is due to the fact that until now there have been no texts on data communication networking written for undergraduate electrical engineering students based on the author s years of classroom experience fundamentals of data communication networks fills that gap in the pedagogical literature providing readers with a much needed overview of all relevant aspects of

data communication networking addressed from the perspective of the various technologies involved the demand for information exchange in networks continues to grow at a staggering rate and that demand will continue to mount exponentially as the number of interconnected iot enabled devices grows to an expected twenty six billion by the year 2020 never has it been more urgent for engineering students to understand the fundamental science and technology behind data communication and this book the first of its kind gives them that understanding to achieve this goal the book combines signal theory data protocols and wireless networking concepts into one text explores the full range of issues that affect common processes such as media downloads and online games addresses services for the network layer the transport layer and the application layer investigates multiple access schemes and local area networks with coverage of services for the physical layer and the data link layer describes mobile communication networks and critical issues in network security includes problem sets in each chapter to test and fine tune readers understanding fundamentals of data communication networks is a must read for advanced undergraduates and graduate students in electrical and computer engineering it is also a valuable working resource for researchers electrical engineers and technical professionals

in the 90s new languages and architectures were developed new systems and networks were produced and new applications invented the basic topics discussed are high speed data communications protocols services and networks for high speed data and for combined voice and data applications i e atm smds frame relay network management oss platforms osi and other information technology services network control and routing emergency control and telecommunication politics this publication offers the material basis for propagating the most advanced ideas products decisions and results of the 90s and thereby it celebrates the advancements of computer communication on the route towards a new era
