recent years have seen an increasing body of literature on the economic histories of individual third world countries this book by eminent scholar lloyd g reynolds is the first to draw together this material and fit it into a systematic framework focusing on the forty one largest countries in asia africa and latin america reynolds shows that the third world has a rich historical record of growth and that its growth patterns bear some resemblance to those observed earlier in europe and north america reynolds begins with a definition of economic growth dividing it into three phases the era of extensive growth during which population and national output increase at about the same rate the turning point a decade or two that marks the beginning of a sustained rise in per capita output and the era of intensive growth marked by a continuing rise in per capita output in chapters that deal with individual countries reynolds dates the turning point explores the attendant economic and political circumstances and

outlines the key features of intensive growth from that point to the early 1980s in the rest of the book reynolds analyzes such issues as why some countries reached the turning point much earlier than others what role was played by political leadership by opportunities for foreign trade and by colonial rule or its absence why certain countries grew faster than others and what government can do to promote economic growth

the world at large is watching both china and india as powerhouses of economic growth the two nations have achieved significantly high rates of economic growth ever since their respective economies liberalized in 1978 and 1991 singapore despite its limited land size and almost total dependence on external trade has performed remarkably well and has moved from the third world to the first this book documents and explains the rapid economic growth of the three key asian economies the book also looks at what has happened to income inequality in the context of superior growth performance it makes comparative assessments and examines the implications for the three nations since free markets have nothing in them to produce a reduction in income inequality among persons households one must at best hope for equality of opportunity notably reflected in identical schooling for all identical health care for all and minimal rather than vulgar inequality in housing this book is particularly useful for both china and india which may wish to study and learn from singapore in regard to the policies programmes and projects aimed at ensuring equality of opportunity the book is backed by considerable expertise on the part of the researchers with demonstrated expertise through their publications spawning a few decades it is invaluable to those who are concerned with designing policies for developing countries aimed at rapid and inclusive economic growth this book has been made possible by the intellectual and financial support extended by the global asia institute national university of singapore
