because they want to start a new life commit suicide or fall into a hole they disappear without a trace the circumstances of their disappearances are often mysterious sometimes deeply contradictory and illogical search dogs find no trail search teams find no trace of the missing for weeks and helicopters even with the latest methods like flir find nothing absolutely nothing no equipment clothing signs of a struggle or evidence of an attack by animals or humans just nothing and when something is found it's often under completely irrational circumstances then suddenly some victims reappear usually without shoes often in places where search teams have already looked many times often so far from the location where they disappeared that it is hard or even impossible to imagine how they could have gotten there most of them are dead but without a determinable cause of death the few who survive usually have no memory of what happened some report being cared for by a large dog a big wolf or some kind of kangaroo preventing them from freezing in the cold in some cases such a creature has been seen by witnesses such beings have also been reported in the mysterious incidents at the so called skinwalker ranch the list of peculiarities in these cases is even longer it seems as though something strange is going on sometimes the victims clothes are found neatly folded next to them or a short distance away sometimes they wear their clothes inside out or clothing that doesn't belong to them sometimes they are found naked even though winter temperatures prevail and they would have had to walk kilometers through deep snow and barely passable mountainous forests to get from the place where their clothes were later found to the place where their body was found naked and barefoot they supposedly traveled 20 kilometers through ice and snow over rugged terrain impossible
