The Seven Spiritual Laws of Success was a phenomenally successful book more than 1,600,000 copies were sold and as copies were passed between friends and loved ones it touched millions more lives. Its author, Deepak Chopra, received thousands of letters from readers many of whom expressed the desire to convey those same principles to their children along with questions about how to do so. This book, The Seven Spiritual Laws for Parents, is Dr. Chopra's answer to those letters and to parents around the world who wish to raise children with values that satisfy spiritual needs as well as create the experience of abundance. After a general discussion of parenting and the gift of spirit, this book explores specific ways to practice the seven spiritual laws as a family: how to convey these laws to children depending on their ages and how to embody them in age-specific activities each day beginning on Sundays with the law of pure potentiality. The Seven Spiritual Laws for Parents moves us beyond private triumphs and failures to experience the spiritual nature of communion with family to share with those closest to us the infinite riches of innocence and love.

New York Times bestseller Deepak Chopra joins forces with leading physicist Menas Kafatos to explore some of the most important and baffling questions about our place in the world: a riveting and absolutely fascinating adventure that will blow your mind wide open. Dr. Rudolph E. Tanzi: What happens when modern science reaches a crucial turning point that challenges everything we know about reality? In this brilliant, timely, and practical work, Chopra and Kafatos tell us that we've reached just such a point. In the coming era, the universe will be completely redefined as a human universe radically unlike the cold, empty void where human life is barely a speck in the cosmos. You are the universe; literally means what it says: each of us is a co-creator of reality, extending to the vastest reaches of time and space. This seemingly impossible proposition follows from the current state of science where, outside the public eye, some key mysteries cannot be solved even though they are the very issues that define reality itself: what came before the big bang? Why does the universe fit together so perfectly? Where did time come from? What is the universe made of? Is the quantum world linked to everyday life? Do we live in a conscious universe? How did life first begin? The shift into a new paradigm is happening; the authors write, the answers offered in this book are not our invention or eccentric flights of fancy. All of us live in a participatory universe; once you decide that you want to participate fully with mind, body, and soul, the paradigm shift becomes personal: the reality you inhabit will be yours either to embrace or to change. What these two great minds offer is a bold new understanding of who we are and how we can transform the world for the better while reaching our greatest potential.

two bestselling authors first met in a televised caltech debate on the future of god one an articulate advocate for spirituality the other a prominent physicist this remarkable book is the product of that serendipitous encounter and the contentious but respectful clash of worldviews that grew along with their friendship in war of the worldviews these two great thinkers battle over the cosmos evolution and life the human brain and god probing the fundamental questions that define the human experience how did the universe emerge what is the nature of time what is life did darwin go wrong what makes us human what is the connection between mind and brain is god an illusion this extraordinary book will fascinate millions of readers of science and spirituality alike as well as anyone who has ever asked themselves what does it mean that i am alive
