in spite of better engineered vehicles and roads traffic accidents are increasing why drivers are now better prepared and trained accidents are also mostly preventable if only drivers learn defensive driving and accident avoidance techniques it teaches among other things to be helpful courteous and defensive regardless of who is at fault but who has the last clear chance to avoid the accident its easy to learn and to execute without knowledge of defensive driving and accident avoidance techniques that person is considered half a driver we cant continue the carnage in the roads its expensive and can result in losing health and or life in this book 1001 ways to drive defensively for your safety and driving enjoyment the ideas are sometimes repeated because driving is a repetition of the same maneuvers for any trip made to help

remember the procedures it is presented in different ways it is also not organized chronologically because when we are behind the wheel things dont happen in logical order the situations and circumstances do dictate the author has a bachelors degree in education he has been a north american driver for almost fifty years most of which were in cold alberta canada where winter could last for six months you guessed it lots of traffic accidents thus the knowledge of defensive driving was a must in alberta he was a schoolteacher operated a driving school a driving instructor and driver examiner author urges safety conscious individuals not to wait any longer get a copy of 1001 ways to drive defensively it makes driving enjoyable less stressful and most of all youll experience safety whenever you are behind the wheel dont forget youre protecting the most expensive thing that was created and no amount of money can replace it this book is suitable for all drivers however discretion is necessary you might save one or two accidents in what is left of your driving days we all have to pitch in and help make the roads safer no government can do it alone we must not forget that other drivers are our friends we havent met why dont we help them and in the process help ourselves too in an accident regardless of who is at fault well still suffer the same consequences it takes only a second or two to help versus days or months recuperating some drivers make this statement whatever i do if other drivers make a mistake what can i do drivers that have this kind of reasoning forget that to be safe one does not only drive their vehicle follow traffic rules but help other driver if they make a mistake apply defensive driving technique if one notices a condition that can develop into vehicle conflict this book will make a perfect gift for anybody for any occasion and they will be grateful and remember you for life

the first soil survey in the philippines was done by mr clarence dorsey an american soil scientist in the province of batangas in 1903 the soils of the philippines however is

the first comprehensive summary of more than a century of soil survey work in this country it integrates the soil concepts of the reconnaissance soil survey results which commenced as early as 1934 and continued until the mid 1960s with the semi detailed soil surveys that continue to this day the result is the first ever genetic key for classifying philippine soils at soil series level thus making it possible for any newcomers to the soil survey field to confidently produce their own soil map at a more detailed map scale to suit the project requirements this book brings together discussions on soils and soil mapping units and up to date international techniques and technologies it makes soils relevant to current political realities and national issues as soil survey moves from a reductionist agricultural development planning tool to a more holistic and integrated approach to enable us to understand our dynamic and complex environment the soils of the philippines will be the only source of authoritative and updated data on soil resources for macro level resource management planning for decades to come with a vanishing breed of experienced soil surveyors not only in the philippines but also worldwide it may remain the only book on philippine soils for the next hundred years or more since soils follow a geological and not a human time frame the contents of this volume will stay relevant for soil surveyors even in a fast changing world as the country leaps from an agricultural economy towards modernization and a more diversified economic base some of the soil series in the philippines for example the guadalupe series underlying the skyscrapers of makati city are becoming extinct as a result of urban development therefore this book serves as the repository for the soils that we possess the soils that have been lost through decades of urbanization while at the same time it creates a soil classification system for the soils we are yet to discover
