20241101	95
20241102	12

20241104	78

Figure 1 Hypothetical Line Graph of Winning Numbers over Time Insert a line graph here showcasing the data from Table 1 with the xaxis representing dates and the yaxis representing winning numbers The graph should visually depict the apparent randomness of the winning numbers

Statistical Analysis and the Fallacy of Pattern Recognition The core belief underpinning many attempts to predict Satta King outcomes is the identification of patterns in the Desawar Satta Chart This relies on the gamblers fallacy the mistaken belief that past events can influence future independent events In a truly random number generation process as ideally should be the case in a fair lottery past results have absolutely no bearing on future outcomes Each draw is an independent event with an equal probability of any number being selected

Figure 2 Probability Distribution of Winning Numbers Insert a bar graph here showing a uniform probability distribution each number has an equal chance of being selected eg if numbers range from 00 to 99 each number should have a probability of approximately 1 This contrasts sharply with the notion of certain numbers being hot or cold
