in the first decades of the twenty first century science fiction literature has been transformed in many ways as the genre has reacted to the dominating influence of films television and video games the growing popularity of fantasy the rise of young adult science fiction and graphic novels the impact of the internet and social media and the increasing diversity of the authors characters and often non western settings the essays making up this volume address these and other changes in two ways some consider new critical approaches to science fiction in response to changing circumstances including analyses of how evolutionary psychology explains today s science fiction the emerging subgenre of cli fi exploring the effects of climate change the use of science fiction in different areas of the college curriculum and a statistical method for identifying works of science fiction others examine significant new authors such as nalo hopkinson charles stross paolo bacigalupi suzanne collins mira grant john sandford and david mura contributors include science fiction author howard v hendrix and experts in the fields of chinese studies gender studies literature philosophy and religion

science fiction is a literary genre based on scientific speculation works of science fiction use the ideas and the vocabulary of all sciences to create valid narratives that explore the future effects of science on events and human beings science fact and science fiction examines in one volume how science has propelled science fiction and to a lesser extent how science fiction has influenced the sciences although coverage will discuss the science behind the fiction from the classical age to the present focus is naturally on the 19th century to the present when the industrial revolution and spectacular progress in science and technology triggered an influx of science fiction works speculating on the future as scientific developments alter expectations for the future the literature absorbs uses and adapts such contextual visions the goal of the encyclopedia is not to present a catalog of sciences and their application in literary fiction but rather to study the ongoing flow and counterflow of influences including how fictional representations of science affect how we view its practice and disciplines although the main focus is on literature other forms of science fiction including film and video games are explored and because science is an international matter works from non english speaking countries are discussed as needed

written by one of the leading authorities on writing publishing and teaching science fiction the science of science fiction writing offers the opportunity to share in the knowledge james gunn has acquired over the past forty years he reflects on the fiction writing process and how to teach it and the ideas he has shared with his students about how to do it effectively and how to get it published afterwards the first section discusses why people read fiction the parts of the short story the strategy of the science fiction author scene as the smallest dramatic unit how to speak well in print suspense in fiction how to say the right thing and how to give constructive criticism the second section takes a more philosophical approach here gunn elaborates on the origins of science fiction its definition the worldview of science fiction and the characters that appear in science fiction novels the third section highlights well known sci fi authors h g wells robert a heinlein isaac asimov henry kuttner c l moore and others and the impact they have had on the development and progression of science fiction

essays in this volume demonstrate how science fiction can serve as a bridge between the sciences and the humanities the essays show how early writers like dante and mary shelley revealed a gradual shift toward a genuine understanding of science how h g wells first showed the possibilities of combining scientific and humanistic perspectives how writers influenced by gernsback s ideas like isaac asimov illustrated the ways that literature could interact with science and assist in its progress and how more recent writers offer critiques of science and its practitioners
