in this study of the rare twelfth century treatise on diverse arts heidi c gearhart explores the unique system of values that guided artists of the high middle ages as they created their works written in northern germany by a monk known only by the pseudonym theophilus on diverse arts is the only known complete tract on art to survive from the period it contains three books each with a richly religious prologue describing the arts of painting glass and metalwork gearhart places this one of a kind treatise in context alongside works by other monastic and literary thinkers of the time and presents a new reading of the text itself examining the earliest manuscripts she reveals a carefully ordered sophisticated work that aligns the making of art with the virtues of a spiritual life on diverse arts gearhart shows articulated a distinctly medieval theory of art that accounted for the entire process of production from thought and preparation to the acquisition of material the execution of work the creation of form and the practice of seeing an important new perspective on one of the most significant texts in art history and the first study of its kind available in english theophilus and the theory and practice of medieval art provides fresh insight into the principles and values of medieval art making scholars of art history

medieval studies and christianity will find gearhart s book especially edifying and valuable

in worthy efforts catharina lis and hugo soly offer an innovative approach to the history of perceptions and representations of work in europe throughout classical antiquity and the medieval and early modern periods covering the broadest possible range of historical writings to elucidate the subject and using visual representations as sources of information as well they address the significance of work for different groups and its impact on their sense of self esteem and their social identity the authors reject the standard historical account of perceptions of work they question the clear distinction generally drawn between classical antiquity and subsequent periods the revolutionary role attributed to christianity and the part played by monasticism humanism the reformation and the enlightenment

thomas merton s deep roots in his own cistercian tradition are on display in the two sets of conferences on the early days of the order included in the present volume the first surveys the relevant monastic background that led up to the foundation of the abbey of cîteaux in 1098 and goes on to consider the contributions of each of the first three abbots of the new monastery that would become the epicenter of the most dynamic religious movement of the early twelfth century the second set investigates the arc of medieval cistercian history in the two centuries following the death of saint bernard in which the order moves from being ahead of its time in its formative stages to being representative of its time in its most powerful and influential phase to becoming regressive with the rise of new religious currents that begin to flow in the thirteenth century merton stresses the need to respect the complexity of the actual lived reality of cistercian life during this period to beware of easy generalizations and instead consider the full range of factual data the result is a richly nuanced picture of the development of early cistercian life and thought that serves as a fitting concluding volume to the series of merton s novitiate conferences providing a thorough initiation into the monastic tradition

encyclopedia of environmental health second edition six volume set presents the newest release in this fundamental reference that updates and broadens the umbrella of environmental health especially social and environmental health for its readers there is ongoing revolution in governance policies and intervention strategies aimed at evolving changes in health disparities disease burden trans boundary transport and health hazards this new edition reflects these realities mapping new directions in the field that include how to minimize threats and develop new scientific paradigms that address emerging local national and global environmental concerns represents a one stop resource for scientifically reliable information on environmental health fills a critical gap with information on one of the most rapidly growing scientific fields of our time provides comparative approaches to environmental health practice and research in different countries and regions of the world covers issues behind specific questions and describes the best available scientific methods for environmental risk assessment
