doctoral thesis dissertation from the year 2013 in the subject economics economic cycle and growth grade 4.0 Atlantic International University business studies and economics course development studies language English abstract development economics entail all the aspects of the development process especially meant for the developing countries to overcome the challenges that impede development. This can be through education, education and man power development, restructuring market incentives, incorporating favorable social and political approaches and practices among other factors. Human beings however need streamlined social and economic systems that are able to achieve development through major changes in social structures, national institutions, cultures and attitudes as well as eradication of poverty, reduction of income inequality and acceleration of economic growth. Debraj Ray (2007) puts it that development economics studies economics of the developing world and has made excellent use of economic theory, econometrics, anthropology, sociology, political science, biology and demography. It needs a lot more dimensional approach to understand it. Other scholars have tried to bring about the key issues that are in development economics such as Dasgupta (1998), Hoff, Braverman and Stiglitz (1993), Ray (1998), Bardhan and Udry (1999), Mookerjee and Ray (2001) and Sen (1999).
