volume 20 presents the latest russian and ukrainian research on the three principal crystallization methods vapor solution and melt divided into three sections chapters focus on heterostructure formation growth from solutions and the preparation of a homogeneous material during melt crystallization topics include the

manifestation of macrodefects connected with the generation of twins in hgc dte films mechanisms that limit the accumulation of an impurity in front of a growth step and a new method for preparing untwinned single crystals of certain high temperature 1 2 3 superconductors

proposing international trade as a path for achieving the sdgs this curated collection envisions a more equitable and sustainable world one where the benefits of international trade are fairly distributed where economic crises are met with resilience and innovation and where the sdgs are not just aspirations but lived realities

essay from the year 2014 in the subject business economics general language english abstract this paper assesses the thirwall s balance of payment bop constrained model by applying it on the nigerian economy and employing cointegration method to observe the relationship between economic growth and current account balance equilibrium while extensive research study on economic growth concentrate on the neoclassical supply oriented approach based on the production function and full employment harrod 1939 emphasized that demand generated growth determine long run economic growth and thirwall developed a keynesian perspective of the determinants of growth embedded on a dynamic version of the harrod s foreign trade multiplier thirwall pinpoints the incapability of economic agents to increase aggregate demand indefinitely in open economies as justification for income growth differences across nations the balance of payment constrained growth model states that a country s economic growth rate is constrained by the desire to generate foreign exchange and reiterate the function of demand as the motivation for domestic growth this arises because growth in export and investment growth in import substitution are the only aspect of aggregate demand that can increase gdp growth and reduce foreign constraints this implies that growth rate is constrained by the balance of payment as the economy cannot grow faster than what is consistent with the balance of payment equilibrium the principle of this keynesian demand side growth theory is that export capability and import attitude establish long run economic growth income derived from external trade constitute the principal medium to finance growing import due to a rise in domestic activities this model differ from the supply induced growth models which evaluate economic growth by using factor inputs such as savings human and physical capital population growth and initial per capital gdp on economic growth reservations about the traditional growth models stem from the fact that the factor inputs have inconclusive roles in the growth process in developing countries also a lot of the neoclassical assumptions have been observed to be unapplicable in developing or transition economies the balance of payment constrained model infer that economic growth are stimulated by demand factors and the main constraint on demand is the balance of payment

a robust empirical determinant of long term economic growth in many developing countries has been the expansion and diversification of the export sector the latter in turn has been influenced by capital accumulation and economic growth the growth model developed here explores this interdependence in the context of the new

growth theory the analytical results are consistent with empirical regularities observed in the exports economic growth linkages the paper also derives a formula for the optimal rate of return to capital in the presence of learning effects and improvement of human resources brought about by export expansion and its interaction with saving and investment

since the evolution of unicellular organisms the skill of eating for survival has reached different levels contributing to a happier healthier and more peaceful existence for both flora and fauna in this process scientific principles have been applied in the indian context the science of human health is known as ayurveda the sanskrit word ayur means life and veda means knowledge or science thus ayurveda refers to the science of health or the science of life the sanskrit word for tree is vriksha when combined with ayurveda the term becomes vrikshayurveda which translates to the science of tree life plants which serve as a major source of food and medicine for humans were studied using the principles of ayurveda and these findings were recorded as vrikshayurveda this book aims to encourage readers to think and act courageously in finding new avenues to create a happy healthy and peaceful life for both humans and plants so that plants in turn can provide the same benefits to mankind carrying forward the legacy of our ancestors at the same time readers must keep in mind that the knowledge passed down from our ancestors is time tested truly scientific and unbiased in this regard m j filliozat professor at the coll ge de france states in the journal of world history that research in ancient india led very early to the development of theories which although ahead of their time were nevertheless logical systems of thought about the structure of reality that is to say of science his observations specifically refer to astronomy and physiology as discussed in texts dating between 1500 bc and 500 bc this statement is also applicable to vrikshayurveda as both astronomy and plant physiology are important components of it further research based on the principles of vrikshayurveda is essential because if the future of mankind is organic then its foundation lies in vrikshayurveda

this volume decentres the view of urbanisation in india from large agglomerations towards smaller urban settlements it presents the outcomes of original research conducted over three years on subaltern processes of urbanization the volume is organised in four sections a first one deals with urbanisation dynamics and systems of cities with chapters on the new census towns demographic and economic trajectories of cities and employment transformation the interrelations of land transformation social and cultural changes form the topic of the land society belonging section based on ethnographic work in various parts of india karnataka himachal pradesh arunachal pradesh and tamil nadu a third section focuses on public policies governance and urban services with a set of macro analysis based papers and specific case studies understanding the nature of production and innovation in non metropolitan contexts closes this volume finally though focused on india this research raises larger questions with regard to the study of urbanisation and development worldwide

gender inequality in education has a significant negative impact on economic growth and appears to be an important factor contributing to africa s and south asia s poor growth performance over the past 30 years in addition to increasing growth greater gender equality in education promotes other important development goals including lower fertility and lower child mortality
