during the recent decades social political and academic endeavours have been made to improve environmental quality and reduce pollution in particular the ocean sea and coastal areas show varying degrees of impact from the multiple human activities carried out in the terrestrial as well as in the aquatic environment ecology is a science which studies the relationship between organisms and the surrounding environment and in the modern era the marine world is getting increasing attention for centuries it has been the final reservoir of human garbage later it became an oil farm with a concomitant increase of coastal population growth and unplanned growth of the fishing industry and the increasing use of sea routes for cargo transport and recreational uses cruises all this led to rising contamination with negative effects on

biota and even human health it is then imperative to know the current situation of the world's oceans that is the main purpose of this book to document at a glance the latest research in the field of ocean pollution
