this book presents the latest research advances in complex network structure analytics based on computational  
intelligence ci approaches particularly evolutionary optimization most if not all network issues are actually  
optimization problems which are mostly np hard and challenge conventional optimization techniques to effectively  
and efficiently solve these hard optimization problems ci based network structure analytics offer significant advantages  
over conventional network analytics techniques meanwhile using ci techniques may facilitate smart decision making  
by providing multiple options to choose from while conventional methods can only offer a decision maker a single  
suggestion in addition ci based network structure analytics can greatly facilitate network modeling and analysis and

employing ci techniques to resolve network issues is likely to inspire other fields of study such as recommender systems system biology etc which will in turn expand ci s scope and applications as a comprehensive text the book covers a range of key topics including network community discovery evolutionary optimization network structure balance analytics network robustness analytics community based personalized recommendation influence maximization and biological network alignment offering a rich blend of theory and practice the book is suitable for students researchers and practitioners interested in network analytics and computational intelligence both as a textbook and as a reference work
