once perceived as distant cold dark and seemingly unknowable pluto had long been marked as the farthest and most unreachable frontier for solar system exploration the pluto system after new horizons is the benchmark research compendium for synthesizing our understanding of the pluto system this volume reviews the work of researchers who have spent the last five years assimilating the data returned from new horizons and the first full scientific synthesis of this fascinating system

this book presents the latest synthetic protocols for the assembly of functionalized cp ligands and their transition metal complexes cyclopentadienyl cp complexes of transition metals belong to the most important classes of transition metal complexes with tightly bound ligands in the coordination sphere since their discovery in the middle of the last century even though they have been known for a long time this field constantly evolves to deliver novel modified cp ligands and complexes and to blossom into new fields of application beside the synthesis of ligands and metal complexes this book concentrates on novel and prospering fields of their application in organic synthesis in this respect the cp complexes have been applied to induce and catalyze various significant chemical transformations such as new c c bond formation involving unsaturated substrates e g cyclotrimerizations cycloadditions carbometallations etc c h bond and c c bond activations followed by subsequent reactions e g arylation alkenylations annulations etc as well as many other processes this volume also covers the recent development and application of chiral cp complexes in enantioselective synthesis
