the greek family of words characterizing the doctrine of justification by faith as it is known in english is most prominent in the writings of the apostle paul it was this doctrine that lay at the heart of the sixteenth century reformation martin luther and his followers considered it to be at the very center of the gospel protestants came to understand justification differently from the catholic church they had left instead of the catholic realist view in which god makes a sinner righteous they came to a forensic understanding by which god as judge declares a sinner righteous during the nineteenth century a third relational view began to emerge it viewed justification as god's gift of a right relationship to a sinner this monograph examines paul's concept from three perspectives the

new testament data the way the doctrine has developed historically and how the doctrine has been expressed in english translations of the scriptures the author concludes that it is the relational view that most accurately depicts paul s concept of justification

atkinson uses qoheleth s work ethic to provide an analysis of ecclesiastes utilising the writings of st bonaventure and martin luther reading ecclesiastes within a penitential framework bonaventure offers a version of the contemptus mundi tradition that is rooted in his metaphysics his commentary is ethically significant for the way he detects the vice of curiously precipitating a perceptual rupture wherein vanity comes to signify sin and guilt luther on the other hand interprets solomon as a wise economic political administrator who preaches the good news of god s involvement in quotidian existence this understanding enables luther to read ecclesiastes eschatologically with labour being seen as a locus of divine activity one may thus read solomon s refrain as an invitation to labour with the expectation of receiving god s gifts in the present finally atkinson suggests that ecclesiastes enhances current conversations regarding the theology and ethics of work by working the doctrinal foci of protology and eschatology through christology the presence of the word then can be found now only in the preaching and sacraments of the church but also in the labour of the worker
