Dr Wung is addressing an important component of critical care nursing the role of technology in patient care. She has assembled top authors to provide current clinical information in the following areas: sensory overload and technology in critical care; alarm fatigue; nurse technology interactions; safety steps to prevent infusion errors; product design and medical devices for nurses; technologies to assess physiologic parameters; hemodynamics; cardio output technologies to support hemodynamics (e.g. balloon pump, ECMO, etc.); interactive computer programs for application of critical thinking skills; information technology; electronic health records (EHR); real time detection of clinical care deviations in ICU; medication safety technology; and EICU. Readers will come away with the updates they need to improve patient outcomes.

Historically, community health nursing has responded to the changing health care needs of the community and continues to meet those needs in a variety of diverse roles and settings. Community health nursing caring for the public's health, second edition reflects this response and is representative of what communities signify in the United States: a unified society made up of many different populations and unique health perspectives. This text provides an emphasis on population based nursing directed toward health promotion and primary prevention in the community. It is both community based and community focused reflecting the current dynamics of the health care system. The second edition contains new chapters on disaster nursing and community collaborations during emergencies. The chapters covering family health, ethics, mental health, and pediatric nursing have all been significantly revised and updated.

Developed in conjunction with the Australian College of Critical Care Nurses (ACCCN), the text has been written and edited by the most

senior and experienced critical care nursing clinicians and academics across the region acccn s critical care nursing is a resource that will foster the development of skilled and confident critical care nurses this comprehensive text provides detailed coverage of a number of specialty areas within critical care nursing including intensive care emergency nursing cardiac nursing neuroscience nursing and acute care it will encourage students to be reflective practitioners ethical decision makers and providers of evidence based care written by expert clinicians academics and educators pedagogically rich chapters with learning objectives key terms case studies practice tips article abstracts learning activities research vignettes heavily illustrated and referenced reflects current clinical practice policies procedures and guidelines the text has a patient centred approach and will provide students with a sound knowledge base and critical thinking skills image bank of all illustrations from the text will be available to lecturers for teaching
